

Let's build our human firewall together

#cybersecure #together

Cyber security is about people,
it is our shared responsibility.

**Let's take ownership
and stay on our toes!**

To receive cyber security vulnerability assistance
and incident response, report a cyber security
incident to your Wärtsilä contact person.

To learn more go to:

<https://www.wartsila.com/about/cyber-security>

**Wärtsilä is committed to a cybersecure
business ecosystem**, where cyber security
is a common and shared responsibility.

In this leaflet you can find some of the
cyber security behaviours which Wärtsilä
recognises as best practices.

You are encouraged to follow these
recommendations and **be an active
participant in cyber security**.

It secures you and others too!

Lock it down

Keep a clean machine

If in doubt, give us a shout

Your Cyber Essentials

#cybersecure #together

Lock it down

- Install a multi-factor authentication (MFA) app and use MFA wherever possible.
- Use different passwords for different accounts.
- Use long passphrases that combine symbols and words.
- Do not disclose your passwords to anyone.

Share with care

- When in public spaces, do not access or work on internal documents in plain sight.
- Connect to VPN when using public networks.
- Configure privacy settings and MFA for every social account.
- Avoid sharing your movements and routines online.

Keep a clean machine

- Keep all software on internet-connected devices up-to-date.
- Only install approved and licensed software and applications.
- Mark files based on their sensitivity.
- Use official cloud services as a primary storage for data.
- Limit printing, shred if no longer needed.

If in doubt, give us a shout

- Take special care with unsolicited emails containing links or attachments.
- Do not open links or attachments from unfamiliar or suspicious senders.
- Report suspicious emails.
- Don't assume calls or texts are legitimate, verify caller's identity.

Stay off the phishing hook

Use strong passwords and multi-factor authentication

Keep your devices up to date

If you connect it, protect it

Stay away from malicious software

Secure your mobile devices

Think before you post and share
