Your one stop shop for all services

With close to 50 years of experience in the fishing industry, a substantial reference list of equipment deliveries and in excess of 250 fishing vessels built by the industry's leading Wärtsilä Ship Design solutions, we have a unique know-how and expertise, backed by a truly global footprint. Our extensive offering for fishing vessels allows us to enhance the business of our customers by providing solutions that are environmentally sustainable, efficient, flexible, and to the budgetary requirements.

FIELD SERVICE FROM €50 PER HOUR

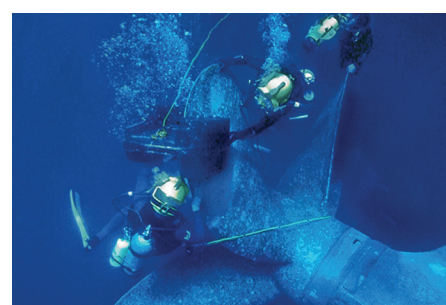

Wärtsilä engineers service and maintain Wärtsilä Engines, Propellers and other equipment by responding in a matter of hours, 24/7, anywhere in the world. Our rates start from as low as €50 per hour and with the backup of the technical expertise to optimise your equipment and maximise your engine uptime, we will ensure that you have the power to fish at a time that is right for you.

ENGINE SERVICES

Wärtsilä Engine services optimise your engine's efficiency by offering complete product and operational support, upgrades and retrofits, as well as reconditioning services. In addition, our efficient fuel injection service enables significant cost savings.

Other Engine services that we can offer are: Field services and parts, technical services, workshop services, remanufacturing services, emergency repairs, fuel conversions.

SEALS AND BEARINGS SERVICES

Wärtsilä Seals and Bearings services provides integrated systems, packages and products that offer lifecycle efficiency, reduce risks, and are environmentally sustainable. Our global service network responds fast and provides expertise anywhere in the world at very short notice when needed. Our offering includes Alignment and Measurement services, upgrades and retrofits, Field services as well as Underwater services.

PROPULSION SERVICES

Our Propulsion services have lifecycle solutions for all propulsion systems, including repairs, upgrades and condition-based monitoring. Our services are designed to match your unique operational requirements, and are therefore cost-effective.

One of our Specialist Propulsion Service workshops is based in Glasgow, Scotland, where you will find a fully equipped and flexible fitting facility. The Workshop is served by overhead cranes, each with a special 32 tonne capacity, and all inside a single building with an eaves height of 7.5m.

Other Propulsion services that we can offer are: quick supply of new Controllable Pitch Propeller (CPP) blades, unique hub reclamation techniques, thruster repairs and overhauls, machining, fitting shop services, control upgrades and repairs.

ELECTRICAL AND AUTOMATION SERVICES

Wärtsilä Electrical and Automation services offers a wide range of energy and efficiency improvement solutions, control, alarm and monitoring modernisations, power management, distribution upgrades and extensions and obsolescence management.

Wärtsilä Electrical and Automation service centre in Montrose is an authorised centre for Basler Electric Company, who are world leaders in power control and protection.

Other Electrical and Automation services that we can offer are: electrical survey, obsolescence studies, inspection, conceptual design, 24 hour technical support, turnkey installation, complete electrical health checks, routine maintenance of AC and DC systems.

PUMPS & VALVES SERVICES

Wärtsilä Pumps & valves services support its customers throughout the lifecycle of their installations with Valve repair service, reconditioning and spares. We have been servicing pumps and valves for over 100 years and we are proud of our heritage, as it is built on the most respected brands in the history of the industry.

Other Pumps & valves services that we can offer are: replacement and upgrades of pumps, cost-effective maintenance, retrofits, Hydraulic and Mechanical upgrades, emergency repairs, 24 hour global support and pre-docking inspection.

ONLINE SERVICES

In the Wärtsilä Online services you can order OEM spare parts online 24/7. You have access to spare part catalogues for your equipment, price and availability information, and spare part ordering. You can track and trace all spare part deliveries through the service regardless if the order was placed in the web shop or not. You also have the possibility to send RFQs and place orders directly to Wärtsilä, as well as get a full overview of your order and quotation history.

Wärtsilä Online Services provide access to a technical knowledge base for fast troubleshooting and the latest product awareness information. If you don't have access to Wärtsilä Online Services, please contact
