Wärtsilä's sustainability approach

Our commitment to sustainability and responsible business is based on our mission, vision, and strategy, which along with our sustainable development objectives create the framework for developing the company's activities and products. Wärtsilä's strategy is based on three key growth areas, energy efficient solutions, gas based technology, and innovative solutions, all of which contribute to a more sustainable future in both the energy and the marine industry.

Our strength is our technological leadership and therefore technology plays a central role in our sustainability work. Wärtsilä Energy Solutions and Marine Solutions businesses focus on developing and providing sustainable solutions for the industries in which they operate, whereas Wärtsilä Services has a key role in supporting our solutions and providing the latest technologies for existing installations through upgrades and modernisation packages.

Wärtsilä identifies and assesses its sustainability risks on an annual basis. Based on the current assessment, the sustainability risks are considered to be at a moderate level. Generally speaking sustainability can be seen as an opportunity for Wärtsilä.

WÄRTSILÄ'S SUSTAINABILITY APPROACH

Wärtsilä's sustainable development is based on three closely interrelated pillars: economic, environmental, and social performance. In the field of sustainable development, Wärtsilä's overriding focus is on the following:

- Economic: profitability
- Environment: environmentally sound products and services
- Social: responsible business conduct

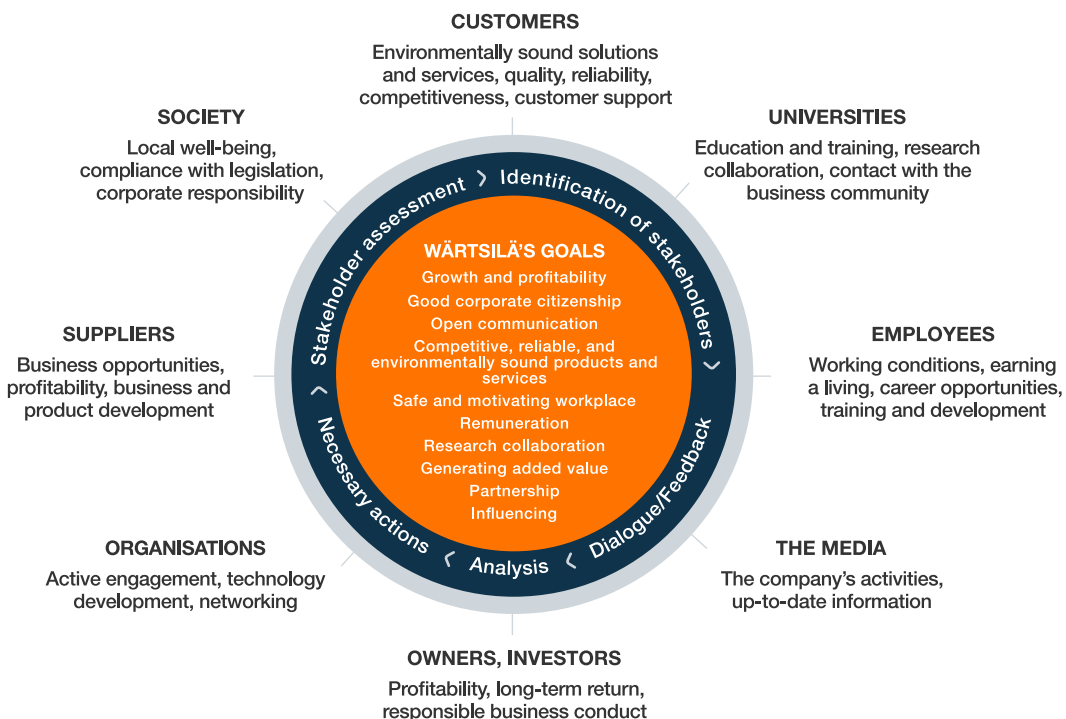

For the sustainability reporting purposes Wärtsilä has identified the following aspects as material: Environmental impacts of Wärtsilä’s products and services, compliance with laws and regulations, economic impacts to stakeholders, personnel skills and development, anti-corruption and -bribery, and occupational health and safety.

The overall management approach of sustainability is presented in the picture Wärtsilä’s sustainability approach. Wärtsilä’s strategy for environmental and social responsibility is presented in the [Strategy section](#). Wärtsilä sets corporate level [sustainability targets](#) for the core areas.

Stakeholder relations

Wärtsilä takes active care of its relations with stakeholders by engaging with them in an open and constructive dialogue. Wärtsilä believes that such an approach is essential when developing operations, products, and services. At the corporate level, Wärtsilä has defined its most important stakeholders to be its customers, owners, suppliers, employees, and society in general. Wärtsilä’s subsidiaries define their own primary stakeholders which, in addition to the ones mentioned above, include local residents close to production plants, educational institutes, and public authorities. Wärtsilä’s Code of Conduct provides the foundation for the management of stakeholder relations. The priorities in managing stakeholder relations vary within Wärtsilä from one subsidiary to another.

MAIN EXPECTATIONS OF WÄRTSILÄ’S STAKEHOLDERS AND WÄRTSILÄ’S GOALS

In order to facilitate this active dialogue with customers, Wärtsilä arranges customer days for existing and potential customers at locations in various parts of the world. During these customer days, subjects of topical interest from both local and global perspectives are reviewed, and existing and future needs and challenges are discussed.

In addition to customer days, the Marine Solutions and Energy Solutions businesses arranged or participated in 191 industry-related events globally during 2015, including international and national seminars, exhibitions, and conferences. These events were attended by customers, potential customers, and other stakeholders, such as investors, consultants, suppliers, students, and other interested parties.

Long-term research programmes are an important means of enhancing open dialogue and cooperation with key industry players and important research institutions. Wärtsilä has actively initiated and participated in the development and work of common research programmes, both locally and internationally.

Dialogue with employees takes place in many formats. More information about the procedures and processes to support active and engaging dialogue with Wärtsilä employees is described in the section covering [Consultation and information procedures in Group companies](#).

The open dialogue and discussions with local and international public authorities and officials is aimed at sharing information and supporting authorities so as to improve the quality of regulation. Wärtsilä participates in public consultations in areas that are of importance to the company.

Channels of dialogue

STAKEHOLDER	CHANNEL OF DIALOGUE	ASSESSMENTS (FREQUENCY)
Customers	Regular contact with customers, lifecycle support for products, customer events and seminars, customer days, customer magazines, the internet, conferences and exhibitions, product documentation, customer feedback system	System for measuring customer satisfaction and quality (Continual)

Owners, investors	Management meetings with investors, financiers, and analysts, stakeholder magazines, general meetings, information meetings, stock exchange and press releases, annual and interim reports, capital markets days, the internet, investor relations surveys, sustainability questionnaires	Investor relations surveys, sustainability surveys and indices (Annual)
Suppliers	Open and active dialogue between the sourcing organisation and suppliers, supplier portal, supplier	Supplier assessments (Continual)

	development, supplier management system, Supplier Days, Supplier Award	
Society	Reporting to, and co-operation with, public officials on issues such as the environment and occupational health and safety, meetings with decision makers, position papers, Open Doors days, sustainability report, corporate presentations, local communications, the internet	Stakeholder feedback (Continual), corporate image surveys (Annual)
Organisations	Membership, regular contact, participation in activities of local trade and industrial organisations, active role in working groups, contact with various public bodies, for example through ministries, reports	
Universities	Opportunities for practical training and degrees, R&D projects, participation in recruitment fairs and seminars, sponsorship of student activities, lectures	Preferred employer surveys (Annual)
Media	National and international business media and journals, trade publications, interviews and press releases, main annual publications, meetings, visits, factory tours	Surveys conducted among business journalists, media surveys, reporting comparisons (Annual)

Activities in organisations

In 2015, Wärtsilä participated in several relevant activities organised by various national and international organisations and associations. The key organisations for Wärtsilä and the nature of Wärtsilä's activities are shown in the table below.

STAKEHOLDER	ORGANISATION	NATURE OF ACTIVITY
Interest groups	Association for Finnish Work, Confederation of Finnish Industries (EK), Finland Chamber of Commerce (ICC Finland), The Federation of Finnish Technology Industries	Membership and participation in activities.
Industrial organisations	Association of Singapore Marine Industries, Brazilian Institute of Oil and Gas (IBP), Brazilian Thermoelectric Generators Association (ABRAGET), Cogen Europe, Confederation of Indian Industry (CII), Cruise Line International Association (CLIA), EnergyVaasa, Engine Manufacturers Association (EMA), EURELECTRIC, European Association of Engine Manufacturers (Euromot), European Cruise Council (ECC), European Engine Power Plants association (EUGINE), Exhaust Gas Cleaning System Association (EGCSA), Hong Kong Shipowner Association, Indian diesel engine manufacturers association (IDEMA), International Council on Combustion Engines (CIMAC), International shipping association (BIMCO), Verband Deutscher Maschinen- und Anlagenbau (VDMA), WaterBorne TP, SolarPower Europe	Board membership and participation in activities of specific working groups (CIMAC, EMA, Euromot, EUGINE). Membership and participation in activities (ABRAGET, Association of Singapore Marine Industries, BIMCO, CII, CLIA, Cogen Europe, ECC, EGCSA, EURELECTRIC, EnergyVaasa, Hong Kong Shipowner Association, IBP, IDEMA, WaterBorne TP, VDMA), SolarPower Europe.

Standardisation organisations	European Committee for Standardisation (CEN), International Organisation for Standardisation (ISO)	Participation in activities.
International organisations	European Sustainable Shipping Forum (ESSF), International Maritime Organisation (IMO), UN Global Compact Nordic Network, United Nations Economic Commission for Europe (UNECE)	Participation in activities through national delegations (IMO). Participation in activities (ESSF, UNECE, UN Global Compact Nordic Network).
Other	Cleantech Finland, Finnish Business & Society (FIBS), European Energy Forum (EEF), European Federation for Quality Management (EFQM), Global Reporting Initiative (GRI)	Participation in activities.

Wärtsilä is included in the following sustainability indices:

FTSE4Good Index

FTSE4Good

MSCI Global Sustainability Index Series

Ethibel Sustainability Index (ESI) Excellence Europe

**OMX GES Sustainability Nordic Index &
OMX GES Sustainability Finland Index**

**ECPI Global Carbon Equity Index &
ECPI Global ESG Best in Class Equity index**

Other recognitions:

Wärtsilä is included in the Ethibel Excellence Investment Register

Wärtsilä has been rated a Prime company by oekom research

Wärtsilä has also been included in the RobecoSAM Sustainability Yearbook 2015

Sustainability management

Wärtsilä's sustainability approach is systematically managed through the Group-wide guiding principles and management systems in place for material sustainability aspects and impacts. Wärtsilä's global guiding principles together with the company's values ensure a harmonised way of working towards sustainable development. Wärtsilä's Corporate Manual includes a description of the company's operating procedures, responsibilities, and the management system structure that are applicable for the entire company. Wärtsilä's governance and risk management principles are described in the [Governance section](#).

The key elements of Wärtsilä's sustainability management is described in the table below. The guiding principles lay the foundations for uniform management practices. The management approach covers procedures, processes, and systems to manage and monitor material aspects.

GUIDING PRINCIPLES	MANAGEMENT APPROACH	MATERIAL ASPECT
<ul style="list-style-type: none"> • Code of Conduct • QEHS Policy • Employee practices • Other policies and guidelines 	<ul style="list-style-type: none"> • People Management • Product Design Principles • Environmental management • Occupational health and Safety management • Responsible business conduct • Supply chain management 	<ul style="list-style-type: none"> • Personnel skills and development • Environmental impacts of Wärtsilä's products and services • Occupational health and safety • Compliance with laws and regulations • Anti-corruption and -bribery • Economic impacts to stakeholders

Guiding principles

Wärtsilä Code of Conduct defines common rules for all our employees, and provides guidance on Wärtsilä's approach to responsible business practices. Key areas of Wärtsilä Code of Conduct include: compliance with laws, transparency and continuous stakeholder dialogue, respect for human and labour rights, fair employment practices, anti-corruption, anti-fraud, and data privacy.

Wärtsilä takes an active approach to the application of the Code of Conduct and promotes its implementation through the effective communication of its contents to its employees. Wärtsilä monitors the application of the Code internally. Suppliers and business partners are an important and integral part of the total value chain of the products and services of Wärtsilä. They are expected to conduct their businesses in compliance with the same high legal and ethical standards and business practices as Wärtsilä. Wärtsilä also promotes the application of the Code of Conduct by monitoring the actions of its suppliers and business partners.

CODE OF CONDUCT IMPLEMENTATION

Group-wide policies complement the Code of Conduct and the commitment to maintain the highest legal and ethical standards in everything we do. Wärtsilä's Quality, Environmental, Health and Safety Policy sets principles for managing environmental impacts of Wärtsilä's products and services. Wärtsilä's corporate policy on equal opportunities and fair employment practices creates a common framework for employee practices in all Wärtsilä companies and covers the following issues: equal opportunities, human and labour rights, well-being at work, non-harassment, and remuneration. Wärtsilä's Corporate Manual includes also other policies, such as anti-corruption, compliance reporting, and Wärtsilä sourcing and purchasing policies, the purpose of which is to safeguard compliance with relevant legislation and provide more guidance on daily business conduct.

Voluntary commitments

Wärtsilä has signed the UN Global Compact initiative in 2009. Wärtsilä supports the ten principles of the Global Compact with respect to human rights, labour, environment, and anti-corruption. Wärtsilä is committed to align the strategy, culture and day-to-day operations with the principles, and to engage in collaborative projects, which advance sustainable development. Wärtsilä's Code of Conduct and sustainability programmes are the practical tools to progress the principles in our sphere of influence.

Wärtsilä participates in the Sustainable Shipping Initiative (SSI). The initiative brings together some of the biggest companies in the maritime sector with the aim of creating a sustainable and successful shipping industry by 2040.

Wärtsilä participates in the Sustainable Marine Biofuel Initiative, the purpose of which is to accelerate the development of reliable combustion engines for sustainable, scalable, and affordable marine bio-fuels.

Wärtsilä has signed the Finnish Business and Society's (FIBS) Diversity Charter. Wärtsilä has also signed an agreement in 2008, whereby the Finnish industry voluntarily endeavours to use energy more efficiently. Wärtsilä North America Inc. has joined the Customs Trade Partnership Against Terrorism (C-TPAT) agreement, signed in 2003.

Wärtsilä Code of Conduct

Introduction

Wärtsilä is committed to carrying out its business in a sustainable way. In order to promote the long-term interests of Wärtsilä and its stakeholders, the company strives to maintain the highest legal and ethical standards in all its business practices. Each employee is expected to act responsibly and with integrity and honesty and to comply with this code and its underlying policies and instructions.

Compliance with laws

All business and other activities of Wärtsilä shall be carried out strictly in compliance with all applicable laws and under the principles of good corporate citizenship in each country where such activities take place.

Each employee is expected to comply with the requirements of those laws and regulations that apply to Wärtsilä's operations and to his/her job and with the Wärtsilä principles of good corporate citizenship.

Openness

Wärtsilä promotes openness and transparency as well as continuous dialogue with its stakeholders, including customers and other business partners, shareholders, personnel, authorities, local communities and the media. Stock exchange rules and competitive considerations may, however, in some cases restrict such openness and transparency.

Wärtsilä strives to be honest and accurate when communicating with its stakeholders, and also Wärtsilä employees shall make their statements in accordance with this principle.

Respect for human and labour rights

Wärtsilä supports and respects the protection of human rights as defined in the United Nation's Universal Declaration on Human Rights. No employee is allowed to take any action that violates these human rights principles, either directly or indirectly.

Wärtsilä supports basic labour rights as defined by the International Labour Organization. In this respect, Wärtsilä upholds the freedom of association and the effective recognition of the right to collective bargaining. In the case that these rights are restricted by local law, Wärtsilä endeavours to offer its employees alternative means to present their views. Wärtsilä does not accept any form of forced or compulsory labour or the use of child labour.

Fair employment practices

Wärtsilä promotes freedom from discrimination based on race, ethnic or national origin, colour, gender, family status, sexual orientation, creed, disability, age, political beliefs or other characteristics protected by law. Wärtsilä fosters equal opportunity and our employees are selected and treated on the basis of their abilities and merits.

Wärtsilä does not accept any form of discrimination, harassment or bullying from its employees.

Occupational health and safety

Wärtsilä endeavours to create hazard-free workplaces for its employees, contractors and others working in various locations by applying high standards of occupational health and safety. Wärtsilä strives to assure the safety of its products and solutions through its world-class product and solution development processes.

Each employee is responsible for complying with the safety instructions, for using personal protection equipment when required and for reporting on any shortcomings regarding safety instructions or protection measures.

Conflicts of interest

Wärtsilä expects full loyalty from its employees. Employees must avoid situations where their personal interests may conflict with those of Wärtsilä. This means, for instance, that employees are not allowed to accept gifts or entertainment from a stakeholder, except a gift or entertainment of a minor value given on an occasional basis, providing it does not create a conflict of interest situation.

Anti-corruption

No Wärtsilä company or any of its employees may, directly or indirectly, promise, offer, pay, solicit or accept bribes or kickbacks of any kind, including money, benefits, services or anything of value. Such payments and favours may be considered bribery, which violates local legislation and internationally recognised principles for combatting corruption and bribery.

Environment

Wärtsilä's target is to develop and produce for its customers environmentally advanced solutions and services that fulfil essential requirements, such as low emissions and high efficiency. Efforts are made to achieve sustainable development by means of raw material selection, processes, products, wastes and emissions through the use of the latest technical advances. Each employee shall comply with the policies and instructions regarding environmental protection.

Relationship with authorities and local communities

Wärtsilä maintains constructive co-operation with authorities and regulatory bodies, at both local and international levels. Wärtsilä seeks to play a role in serving the needs of the local communities whenever possible.

Innovation and protection of proprietary information

Wärtsilä supports and encourages innovation by its employees in all areas of its activities.

Wärtsilä's intellectual property is one of its most valuable assets, and the patents, trademarks, copyrights, trade secrets and other proprietary information of Wärtsilä must be protected. At the same time, each Wärtsilä employee must respect the intellectual property rights of others.

Accuracy of accounting records

Wärtsilä accounting records must be accurate and reliable in all material respects. Unrecorded funds are prohibited. The records must not contain any false, misleading, or artificial entries.

Competition and fair dealing

Competition laws aim to protect consumers and businesses against unfair business practices. Each employee shall comply with those laws. Actions such as participation in cartels, abuse of a dominant position in the market place or the exchange of price or other commercial information between competitors are prohibited. Wärtsilä employees should be sensitive to competition concerns when attending occasions where competitors, or potential competitors, can be present.

Anti-fraud

Wärtsilä does not tolerate fraudulent behaviour or activities, such as embezzlement, fraud or theft. Such violations will lead to immediate termination of employment and are subject to criminal sanctions.

Implementation

Wärtsilä takes an active approach to the application of this code and promotes its implementation through the effective communication of its contents to employees. Wärtsilä monitors the application of this code internally.

Suppliers and business partners are an important and integral part of the total value chain of the products and services of Wärtsilä. They are expected to conduct their businesses in compliance with the same high legal and ethical standards and business practices as Wärtsilä. Wärtsilä promotes the application of this code by monitoring the actions of its suppliers and business partners.

In the case that questions arise regarding the interpretation of, or compliance with, this code, Wärtsilä Legal Affairs should be contacted.

The application of the code will be reviewed from time to time by the Board of Management, which may decide on necessary revisions or interpretations.

Reporting violations

Any Wärtsilä employee becoming aware of a potential violation of this code must contact his or her superior or Wärtsilä Legal Affairs. The president of the respective subsidiary must be informed, unless he or she is party to the alleged violation, in which case the Group General Counsel of Wärtsilä Corporation must be contacted. Wärtsilä will investigate all reported matters with discretion. Wärtsilä shall not take any adverse actions as a result of such reporting against any employee reporting in good faith what he or she believes to be a violation of this code.

Sanctions

Violation of this code may lead to a warning, the termination of employment and the payment of damages. Additionally, certain violations of a criminal nature can lead to criminal sanctions, such as fines or imprisonment.

Approved by Board of Management in 2011.

Wärtsilä's Quality, Environmental, Health and Safety Policy

We shape the marine and energy markets with advanced technologies and focus on lifecycle performance to enhance our customers' business and benefit the environment being:

- Reliable and safe
- Efficient and environmentally sound
- Compliant with the applicable legal requirements and regulations.

We continue to improve our performance and reduce adverse environmental impact to satisfy our customers and other stakeholders.

We create and maintain safe and healthy workplaces for our employees and partners in all of our business operations. We give our employees the authority to stop work if conditions are unsafe or quality is compromised.

Our skilled organisation acts as a responsible global citizen.

Approved by Wärtsilä Board of Management 10.12.2015

Jaakko Eskola
President & CEO

Employee practices

Wärtsilä's corporate policy on equal opportunities and fair employment practices creates a common framework for employee practices in all Wärtsilä companies and contains the following sections: Equal opportunities, Human and labour rights, Well-being at work, No harassment accepted, Remuneration, Implementation, and Violations.

Equal opportunities

Wärtsilä is committed to fostering equal employment opportunities, in which individuals are selected and treated on the basis of their job-relevant merits and abilities and are given equal opportunities within Wärtsilä.

Wärtsilä's policy is to treat all employees equally on the basis of their merits, without discriminating them on the basis of their race, ethnic or national origin, colour, gender, family status, sexual orientation, creed, disability, age, or political beliefs.

Employee benefits and remuneration

The basic principle for remuneration in the company is to pay the same wage for the same job and the same performance. The salary is meant to be just, fair, and encouraging. Differences in individual salaries are based on how demanding the job is, on differences between competence, work experience, and performance and not on gender.

In general, temporary and part time employees are offered the same benefits as permanent employees. In some countries, eligibility is linked to months or years of service – such differences being typically based on collective agreements according to local legislation.

Individual salaries are reviewed once a year in connection with the performance review and in the framework of annual salary increase guidance. The company may pay employees an annual bonus in accordance with company rules and based on separate bonus agreements. Based on financial and individual performance, bonus outcome is determined once a year. Employees may be paid a spot bonus based on exceptional performance. Benefits, such as a company car, service year award, and well-being, fitness, and health services, are planned and implemented locally taking into account both company guidelines and national practices.

Minimum notice period

Wärtsilä complies with European Union directives, local acts of co-operation in the companies and corporations, collective agreements and equivalent regulations concerning consultation and local bargaining. Concerning the termination of employment, Wärtsilä respects national labor union agreements and employment legislation.

In the case of occurrences having significant business or social implications, such as personnel redundancies, the transfer in full or part of production facility location, structural changes, as well as transnational effects, the EWC Working Committee and/or local employee representatives are consulted before decisions about such matters are made or, if that is not possible, as soon as possible. The objective is to provide information about any significant operational change at the time of planning.

Competency management

Wärtsilä's Competency Management and Development frame is a structured way to carry out long-term competence development plans within our businesses and functions. Wärtsilä has defined 16 global job families consisting of generic job descriptions for seven different demand levels. In the job description, the most critical competencies of the job are defined and used as a basis for individual position competence requirements. Typically in the connection of annual development discussion, individual competencies are assessed against the job requirements and position profile. Competence assessment of our employees and a comparison with competence targets allow us to analyse competence gaps and create development plans accordingly.

All learning and development activities in Wärtsilä strive to develop, maintain and renew the short- and long-term skills and competencies required to fulfil our strategy. Having the right competencies available at the right time and being able to continuously adapt to a changing business environment are critical success factors for Wärtsilä.

Consultation and information procedures in Group companies

Wärtsilä's procedures for consultation and information within the Group are arranged in each country according to local legislation. Wärtsilä's Code of Conduct calls for ongoing and open dialogue between the company's management and employee representatives through co-determination bodies, and employees are kept informed of both the Group's situation and that of their particular company. Company management and personnel engage in an open discussion also in those countries where there are no formal co-determination bodies as such. Regular briefings for personnel are an integral part of the operating procedures of Wärtsilä companies. Employee participation in decision-making also extends to occupational health and safety (OHS). Most Wärtsilä units have an OHS committee with representatives from all personnel groups.

In addition to Wärtsilä's procedures for consultation and information for employees at the local level, the European Works Council (EWC) handles issues that affect at least two companies located in the EU and the Group as a whole. The EWC and its working committee play an active role in considering and pursuing transnational issues.

Dialogue at the individual level is conducted through development discussions, which are held at least once a year. The subjects covered in these discussions range from the Group's and business unit's targets to the individual's job description, competence development, career alternatives, personal targets, and feedback. Development discussions are by definition held with all employees.

Employees are able to have a direct impact on the company's operations and their development by making suggestions. Each Wärtsilä employee can offer suggestions for improvement in operations either through the continuous improvement process (CIP) or by submitting private initiatives. CIP-proposals are discussed jointly and need a common decision to be put into effect. Individual initiatives are evaluated by experts within the company and, if found to be feasible, are put into effect. Another global channel for new ideas is the MyDea tool in the Idea Management portal via which new ideas concerning products and solutions, operational development, and business are proposed and channeled to the nominated substance owners for comments and further reviews.

Business performance updates are given to all personnel on a regular basis in connection with Wärtsilä interim reporting. The company intranet "Compass" and the employee magazine "Wattsup" are the common global channels for internal communication.

Recognition of excellent performance

Wärtsilä encourages its employees to be innovative by granting an annual Technology and Innovation Award either to an individual or to a team for the best technical innovation of the year. The award criteria are that the invention must be innovative and environmentally sound, it must represent leading technology, improve a product or process, and offer potential for cost savings. Wärtsilä also grants annually a Customer Care Award for a team or individual who actively participated in the initiatives leading to development of business operations, quality improvements in how we serve and partner with customers, customer satisfaction, or Wärtsilä values demonstration.

Management approach

Wärtsilä utilises various tools and processes to manage and to further develop its sustainability. The key tools for sustainability are presented in the table below.

Wärtsilä's tools for sustainability

BASIC PRINCIPLES	SYSTEMS AND PROCESSES	OTHERS
Vision, Mission, and Strategy	Quality Management System	Sustainability target setting
Corporate Governance	Environmental Management System	Sustainability management reviews
Corporate policies and principles: Code of Conduct, QEHS policy, Policy on Equal Opportunities and Fair Employment Practices, Anti-Corruption Policy, Compliance Reporting Policy etc.	Occupational Health and Safety Management System	Business development tools: Due diligence, Environmental surveys
Corporate Manual	Supplier Management System	Stakeholder dialogue
Corporate requirements for suppliers	Risk management process	Sustainability reporting

Wärtsilä's management system

Wärtsilä's management system aims to generate added value for Wärtsilä's various stakeholders, achieve the company's strategic objectives, support sustainability performance, manage operating risks, and enhance Wärtsilä's performance through the continuous improvement process. The system includes a range of tools, such as systems for managing quality, the company's environmental responsibilities, and occupational health and safety. Management reviews are conducted at various levels of the organisation to monitor the effectiveness of the system, the achievement of targets, and the development of key performance indicators. Wärtsilä's processes are developed in the Businesses, the Business lines and the Functions. These development projects are governed by the Wärtsilä Controllers' meeting and OD Portfolio Management Team, Wärtsilä Presidents' Quality Review and Quality Reviews, and the Functional Management Teams.

Wärtsilä's Board of Management is responsible for defining the company's main strategies, principles and policies, and for the management system itself. The Board of Management regularly monitors the effectiveness and performance of the management system. Responsibilities are distributed to the line organisation at all levels of the company, and the management system defines a specific sphere of responsibility for each Wärtsilä employee. Work groups for developing the management system are appointed at the corporate level and in most Wärtsilä subsidiaries. At the Group level, the following work groups coordinate the development of product and operational issues:

WORK GROUP	FOCUS	MAIN TASKS
Wärtsilä Presidents' Quality Review	Quality	Overall responsibility for Wärtsilä's quality, quality process improvement, and achievement of strategic quality goals
Wärtsilä Controllers' Meeting	Strategic Operational development	Overall responsibility for Wärtsilä's operational development and the operational development plans, and governing the work of IM and Process development
Business Line Quality Reviews	Quality	Support and oversee quality development based on customer perception of our quality and full end-to-end life cycle view. Platform for focusing on the key improvement areas with biggest impact to our customers. Cross functional decision making to increase efficiency and shorten resolution lead time.
Wärtsilä OD Portfolio Management Team	Operational development	Operational development road map, targets, and guidelines based on business strategies and targets, and overall operational development process responsibility for the approval of the Wärtsilä Controllers' Team. Cross-divisional operational development alignment and harmonisation.
Wärtsilä EHSS Management Team	Environmental, health and safety and security (EHSS)	Overall responsibility for Wärtsilä EHSS, EHSS management system development, corporate level overall responsibility for Wärtsilä EHSS measuring and target setting, and monitoring of legislation developments

Management systems

PROPORTION OF WÄRTSILÄ COMPANIES WITH CERTIFICATION

Quality (ISO 9001)	82%
Environment (ISO 14001)	66%
Occupational health and safety (ISO 18001)	65%

People management

The main goal of Wärtsilä's People Strategy is to support group strategies and ensure their successful implementation by developing the company's organisation and competencies to meet both current and future business needs.

The key focus areas of the strategy continue to be the further development of leadership and a leadership culture, as well as an emphasis on high-performance and operational excellence throughout the organisation. Strengthening accountability and ownership is encouraged by promoting employee engagement through a culture of open communication, integrity, and innovation. Similarly, the strategy ensures that the Businesses have the required resources and skilled and motivated people at their disposal. This involves the implementation of changes within the organisation, a

continuous focus on the management of competence development and stronger performance with quality target setting, proper and regular feedback, the evaluation of overall performance, and recognition of outstanding performance.

Wärtsilä Human Resources continues to develop people management processes, tools, and ways of working that are consistent across national and organisational boundaries. In particular, an intensive effort has been made to further develop skills in people management by rolling out Management Focus, a modular training programme for line managers. The aim is to have all managers participate in these training modules, and the participation has indeed become a standard way of working in Wärtsilä. Wärtsilä Human Resources invests in technologies and tools that enable quick access to online reports, employee information, and annual compensation planning for both local and multi-country teams.

Building an inclusive company culture

Wärtsilä continued to work on diversity during 2015. The company's values of "Energy, Excellence and Excitement" are strengthened by the diversity of its employees. Wärtsilä aims to capture opportunities and make things happen, do things better than any of its competitors, and foster openness, respect, and trust to create excitement. A diverse workforce generates higher profits, has better complex problem-solving skills, and enables access to a larger talent pool.

Wärtsilä's Diversity Initiative began in 2012 with the aim of fostering an inclusive corporate culture at all levels of the organisation so as to meet global requirements. By investing in diversity and supporting employees of varied age, gender, personality, and educational background, Wärtsilä becomes a more innovative business partner, as well as a more attractive employer.

Since the Diversity Initiative was initiated, awareness of diversity-related questions has risen. Follow-up analyses indicate that the overall feedback towards the initiative is positive, and diversity has become a key topic for Wärtsilä.

In 2015, the emphasis was on local diversity action planning and implementation. In addition to local activities, Wärtsilä participated in various initiatives, including the Dialogi 2015 programme in Finland with nine other major companies. The purpose of this programme was to further develop and promote female leadership and careers in business, and Wärtsilä hopes to attract young female university students and thus become more known as an employer of choice among them. Wärtsilä was also one of the main sponsors of the bi-annual Women in Tech event, which is part of a movement aimed at encouraging more women to enter the field of technology.

Performance management

One of the essential elements of the Wärtsilä People Strategy is to emphasise and develop a culture of high performance throughout the organisation.

The performance management process supports Wärtsilä in reaching its business targets by translating business strategies into team and individual objectives. Each Wärtsilä employee needs to know and understand Wärtsilä's business strategies and their goals. More importantly, everybody needs to know the targets set for their own units and the main target areas related to their own work.

The positive trend in development discussion compliance has continued. The average coverage of annual development discussions was 92% globally. As a part of the performance management process, each employee receives a proper performance feedback and evaluation based on their overall job performance, as well as a personal development plan.

Overall performance evaluation is one of the considerations in compensation decisions, and is in line with the principle of performance-based rewarding.

Learning and development

Wärtsilä continued its leadership development activities in many areas. New learning solutions for line managers have been developed to support them in their people management and leadership roles. An annual executive development programme was held in November, and six other global leadership development programmes for senior managers were held during 2015. New learning solutions for core competence areas in sales, project management, and technology have been developed and delivered, and they continue to be part of the learning offering in 2016.

Wärtsilä's HR organisation has created Leading Change intranet pages with supporting materials for all involved in leading change in the organisation. In addition to the toolkit, a half a day "train the trainers" workshop module was introduced in September 2015. The aim of the programme is to create a pool of internal change facilitators capable of supporting project owners in their change initiatives.

Learning at work, self-learning, mentoring, coaching, job rotation, and assignments designed to encourage competence development and the transfer of competence and skills from experienced to younger employees, are integral parts of the development of learning and competence within the company. Employees are given formal classroom training at all organisational levels; from induction training for new employees to training courses for the company's top executives. Wärtsilä employees attended a total of 55,620 training days during 2015; an average of 3.0 training days per employee.

Engagement

At Wärtsilä, equal opportunities and personal growth are core beliefs. The company supports its employees in self-improvement and in finding their own path within the company. Recruiting and retaining the best talent enables Wärtsilä to be the most valued business partner of its customers, and the employer of choice for current and future employees.

Strengthening engagement through the active communication of strategies, high quality dialogue, and giving and receiving feedback, has been a long term target for all Wärtsilä entities. It has clearly paid off as the Engagement Index measured through MyVoice Survey has had a positive trend through recent years.

In May 2015, the eighth MyVoice survey results were published. MyVoice is a global Wärtsilä employee satisfaction survey. The purpose of the survey is to collect employee feedback on issues related to well-being at work, the work environment, management and strategy, and to initiate development actions for improving practices.

On the corporate level, the results indicate continued improvement. Among the overall observations from the 2015 results, Wärtsilä values are well known, and pride in working at Wärtsilä is at a higher level than earlier. Entrepreneurial drive, customer centricity, and a passion for doing right are seen as strong values in all businesses. There was also a strong positive feedback on communication with managers. The results also indicated that equal opportunities and diversity awareness have increased at Wärtsilä. Challenges indicated in the survey included rewarding, as well as the amount of communication. More aligned work instructions were also expected throughout the teams.

Environmental management

The environment is the key element in Wärtsilä's approach to sustainability. For us, environmental responsibility has two dimensions: products and operations. Most of our efforts to improve our environmental performance, also within our operations, are conducted as part of product development and improvement. This work is supported by operational measures, which are based on achieving high environmental standards and continuous improvement.

Continual improvement of environmental performance requires the organisation to constantly work in a systematic way. This work is guided by our strategy and its environmental targets, the Code of Conduct, and the company's policies relating to Quality, Environment, Health and Safety, and it is co-ordinated and monitored by the EHSS Management team. In developing our operations, processes, and products, we endeavour to use the latest technologies available for improving efficiency in areas such as material and energy consumption, as well as for reducing and managing emissions and waste. To increase Wärtsilä employees' awareness of environmental aspects, an e-learning tool was introduced in 2015, which both explains the environmental aspects of Wärtsilä's products, as well as an individual's possibilities to reduce environmental impacts in office environment

Wärtsilä has defined a process for the development of a product environmental strategy and its targets. The process includes the identification of aspects and impacts of the products, the means to influence these impacts, the identification of enabling and restricting boundary conditions, and the analyses of the information and the preparation and implementation of the strategy and the targets.

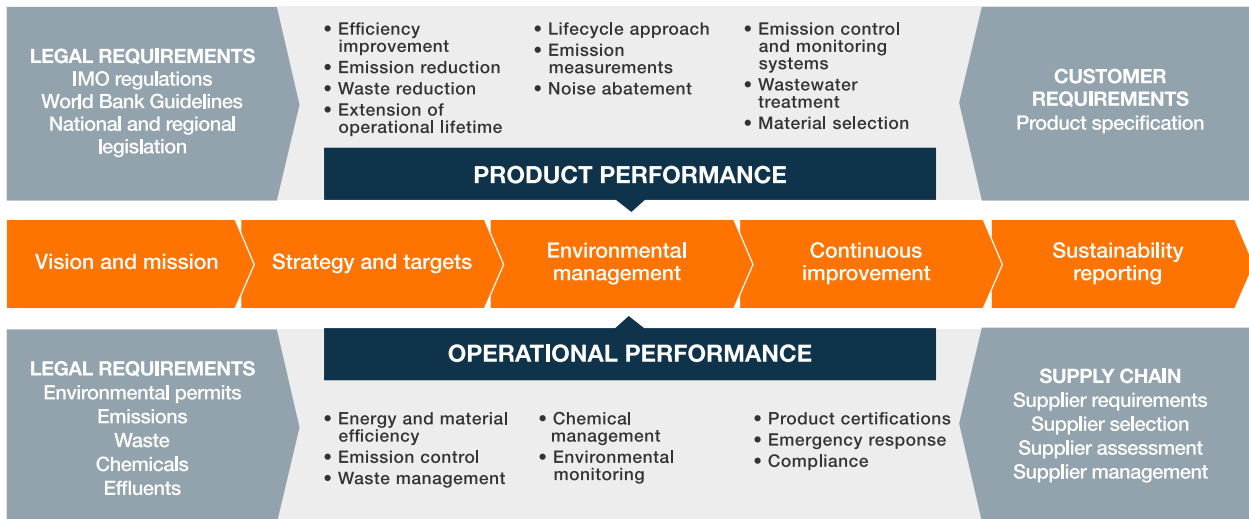

Wärtsilä continuously develops and improves its operations and products with the help of certified environmental management systems. Our principle is to apply the certified EHS (Environmental, Health and Safety) management systems based on ISO 14001 and OHSAS 18001 in all Group companies, excluding those companies focusing purely on sales. These units are required to apply Wärtsilä's internal EHS model. Our EHS management systems cover all the operations of our subsidiaries, which means that we are able to promote environmental protection and reduce adverse impacts on a wide front.

The company's EHS management system focuses especially on complying with legal requirements, identifying and reducing environmental aspects, impacts and risks, training personnel and clearly defining their responsibilities, full documentation of activities and procedures, action in emergencies, and continuous improvement of environmental performance. The company's subsidiaries set their own targets covering significant environmental aspects of their operations and monitor the overall performance of the management systems. At the end of 2015, 49 Wärtsilä companies operated with a certified environmental management system. These certified environmental management systems cover roughly 88% of Wärtsilä's total workforce.

WÄRTSILÄ'S ENVIRONMENTAL STRATEGY – A CONTINUOUS PROCESS

ENVIRONMENTAL MANAGEMENT IN WÄRTSILÄ

Occupational health and safety

Wärtsilä's occupational health and safety principles are defined in the Code of Conduct, the company's QEHS policy, and in the directive on environment, health, and safety (EHS). Wärtsilä's subsidiaries are required to have a management system in place that conforms to the QEHS policy and the EHS directive. The main aspects of the management system relate to compliance with legislation, identifying and minimising occupational health and safety risks, personnel training, implementing effective health and safety programmes and instructions, recording and investigating occurred incidents, and the continual improvement of occupational health and safety performance. The number of Wärtsilä subsidiaries with OHSAS 18001 certification increased during 2015. As at the end of 2015, 48 Wärtsilä companies operated with a certified occupational health and safety management system covering roughly 79% of Wärtsilä's total workforce.

In addition to the management system, Wärtsilä companies apply occupational health and safety programmes as required by local legislation. These are normally developed by occupational health and safety committees made up of company management and personnel representatives. Altogether, 78% of Wärtsilä companies have an occupational health and safety committee.

The indicators used to measure occupational health and safety performance include the number of accidents, the time of absence due to sickness, and the frequency of accidents. Wärtsilä has set a corporate level target of achieving zero lost time injuries. This target is a long-term commitment from the company to strengthen a safety culture, and it requires actions from all Wärtsilä companies and employees. The safety performance of the companies is monitored on a monthly basis and the results are reviewed by the Board of Management. To further strengthen Wärtsilä's safety culture, a new global programme known as ZeroMindset has been introduced. ZeroMindset will focus on three key elements: our leaders, the shared safety mindset of individuals, and effective safety tools and practices.

During 2015, Wärtsilä continued expanding its proactive WeCare programme. WeCare is a global software and way of working for reporting and investigating near misses, hazards, and accidents. A total of 8,960 incidents were reported to the WeCare system in 2015, of which 88% represented proactive near miss or hazard observations. More than 3,820 Wärtsilä employees took part in the process of reporting, investigating, and action handling through WeCare, which indicates a good acceptance and communication of the system. As a final result, incident investigations resulted in 6,150 different improvement actions completed within Wärtsilä. As a new feature, a WeCare mobile app was introduced in 2015 to increase reporting, especially in locations other than Wärtsilä premises.

In 2015, Wärtsilä continued the global Zero Injury training programme comprising a 4-hour e-learning and 4-hour practical training session. The target group for the training consists of Wärtsilä's front-line personnel working in factories, workshops, and customer premises. The e-learning has been translated into 11 major languages in order to ensure effective training in different countries. Since the implementation period started in 2012, a total of 8,940 employees have completed the e-learning, and 5,100 employees the practical training. During 2015, the amount of participants in practical training increased by 2,000. As a new element, zero injury e-learning for office personnel was introduced so as to have full coverage for this training.

In addition, Wärtsilä introduced its first global Safety Day, which took place on the 10 March 2015. The theme for this event was "save your fingers", as hand injuries represent over 40% of Wärtsilä's lost time injuries. This first Safety Day was a great success with local events being held in locations throughout the entire Wärtsilä network. As part of the event, employees put their hand prints to banners to commit themselves to saving their fingers.

Wärtsilä's QEHS policy was revised in 2015 to clearly state that employees are authorised to stop work if conditions are unsafe.

Responsible business conduct

Human and labour rights

Wärtsilä supports and respects basic human values as outlined in the UN's Universal Declaration of Human Rights. Wärtsilä also supports the Ten Principles of UN Global Compact, of which six principles are related to Human and Labour rights.

Wärtsilä's employees represent 131 nationalities. The company supports fair and equal treatment of all its employees. Wärtsilä supports the work-related rights defined by the International Labour Organization. Therefore the company works to ensure that there is freedom of association and right to collective bargaining in the company. In those countries where local legislation does not recognise these rights, Wärtsilä endeavours to give employees other channels for expressing their opinions.

Wärtsilä does not accept the use of forced labour or child labour in any form. Human and Labour rights are part of Wärtsilä Code of Conduct training material and also Wärtsilä Supplier Handbook. At the end of 2015, 87% of Wärtsilä's employees have successfully completed the Code of Conduct training.

Preventing corruption and bribery

Wärtsilä's Code of Conduct, Anti-Corruption Policy, and Broker Directive expressly prohibit the company and its employees from offering or accepting any kind of benefit considered to be a bribe and from taking actions that could give rise to a conflict of interest or breach of loyalty. The instructions make it compulsory to comply with anti-corruption laws of all the countries in which Wärtsilä does or intends to do business and urge the reporting of any cases of corruption and bribery. The company continues to rendering an extensive training programme for its personnel on anti-corruption principles and applicable legislation as well as the relevant company policies and procedures.

Political lobbying

Wärtsilä's policy is to engage in an open dialogue and discussion with both local and international public authorities and officials. The aim of the dialogue is to share information and improve the quality of regulation. Wärtsilä participates in public consultations in the areas of importance to the company. Wärtsilä is part of the Transparency Register of European Commission.

Competition regulation

Wärtsilä has a compliance programme for managing risks relating to competition law in place, and the company's management is strongly committed to implementing this programme. The cornerstone of the programme is a competition law manual, which is kept up-to-date, providing information on competition rules and guidelines for Wärtsilä's personnel. As before, Wärtsilä arranged a number of competition law training seminars in 2015 for the relevant personnel in order to promote knowledge of competition laws and thereby ascertain full compliance with them.

Security management

Wärtsilä has a corporate security policy and various guidelines, which incorporate human rights considerations and international best practices. Wärtsilä's security management principles and strategies are reviewed and approved in the Presidents Security Meetings, which consists of Presidents of each Business, Executive Vice Presidents for Corporate Relations, Legal, Finance, and Control, and security professionals. Security management in Wärtsilä is divided into six specific security areas: Personnel, Premises, Information, Cyber, Crisis Management, and Travel security. Operational security management in these areas is implemented on the business and local level. Wärtsilä prefers security service providers who are members of ICoCA (International Code of Conduct Association).

Local community approach

Wärtsilä aims to contribute towards the well-being of local communities in which the company is present. This can be reached for example by creating employment, by paying taxes and social dues, by providing training and education to employees, by co-operating with local stakeholders, and by supporting local development.

The guiding principle of Wärtsilä's Code of Conduct is to promote openness and good interaction with its stakeholders locally. This applies as much to the families of personnel, our neighbours, educational institutions, and the media as to local authorities and officials. The methods used towards this end include Open Door days, press briefings and different modes of communication for different target groups.

As a truly international company, Wärtsilä has delivered solutions to more than 170 countries. Wärtsilä supports its solutions globally during their entire lifecycle, often spanning up to 30 years. Thus, Wärtsilä can at times be present in countries facing various uprisings, ethnic conflicts, area disputes, or violations of human rights. Conducting business locally emphasises the importance of responsible business practices. Governments and the international community define the proper framework for companies to conduct their business. Wärtsilä complies with relevant legislation and international conventions. Wärtsilä complies with all relevant guidelines of the OECD and the International Chamber of Commerce and with the sanctions set by the United Nations and the European Union, by supporting their implementation. In addition, the Wärtsilä Code of Conduct applies to all Wärtsilä employees. We are committed to sustainable development and responsible business conduct, and we promote the Ten Principles of the UN Global Compact within the sphere of our influence.

Wärtsilä's impact on employment, the public sector, and the company's activities for charitable purposes are described in the Economic Performance section of this report. Measures to evaluate the impacts on local communities in case of operational changes of Wärtsilä subsidiaries are determined case by case.

Product design principles

Wärtsilä strives to develop environmentally sound, safe, and reliable products and solutions for its customers. By providing lifecycle maintenance, reconditioning, and retrofitting services for its products, Wärtsilä is able to support its customers' operations throughout the entire life of service of Wärtsilä products. Reconditioning of engines and components increases the reliable service life of the products. Modernising can improve current operational performance of installations and enables customers operations to meet tightening future regulative requirements.

The majority of the international environmental policies and requirements for Wärtsilä's products and solutions are set by the International Maritime Organization (IMO), the UNECE (United Nations Economic Commission for Europe), and the World Bank. On the national or regional level, organisations such as the U.S. EPA, the European Commission and market areas such as Germany, Japan, and India are considered the most important policy and regulatory directors for Wärtsilä products.

The IMO is responsible for adopting its own standards for the safety and security of shipping and the prevention and control of marine pollution and emissions from vessels. The IMO regulates nitrogen and sulphur oxide emissions as well as ballast water treatment procedures and limitations. The World Bank/IFC (International Finance Corporation) provides general and industry specific instructions of good international practices such as the thermal power plants' EHS (Environmental, Health, and Safety) guideline, which is today the minimum environmental standard in global power plant projects. It is adhered to in most of the finance activities for projects in emerging markets. In the European Union, the EU Industrial Emissions Directive (IED) sets the requirements to minimise pollution from different industrial sources throughout the EU.

Wärtsilä's engines are designed to meet the requirements of the European Commission's Machinery Directive, the SOLAS Convention and other relevant safety directives, while Wärtsilä's propulsion systems are designed to comply with the SOLAS and the safety requirements of relevant classification bodies. New types of engines must also meet international safety requirements. Type approval is acquired from classification societies before new products are launched. Wärtsilä's Ship Design follows class society and flag state rules in the design process to secure safe and compliant designs for its clients. Class approval is required for drawings and calculations to be delivered to the client before construction of the vessel starts. Wärtsilä's products are delivered with appropriate user guides that include basic information about the products and full instructions for their use. In addition, Wärtsilä provides appropriate specific training to ensure environmentally sound and safe utilisation of Wärtsilä's products at customers' daily operations.

In order to ensure Wärtsilä's ability to respond to future regulation requirements, the company actively monitors legislative initiatives and changes in environmental legislation. As a result, Wärtsilä has focused its R&D activities for development of new environmental sound products and solutions that meet the future demands of the changing operating environment.

Supply chain management

Suppliers play a significant role in our delivery process. We aim to have close and excellent relationships with our key suppliers in order to ensure that both parties have a mutual understanding of and are able to respond to our strict process and product requirements. Apart from financial benefits, close relationships stimulate knowledge sharing and create an environment of innovation and stronger integration of strategic suppliers into Wärtsilä's value chain. Wärtsilä has an extensive supply base with more than 25,000 active suppliers, most of whom are located in Europe, where we have our main production units. We are also continuously investing in developing a strong supply chain network in Asia.

Wärtsilä has defined its processes for choosing suppliers, determining their requirements, and developing the supply relationship. Wärtsilä offers its suppliers a partnership that strengthens the competitiveness of both parties. A precondition of this partnership is an open and continuous dialogue. Partnership thinking is also applied in Wärtsilä's research and development activities, where the company often collaborates with universities, research institutes, and key suppliers.

Wärtsilä's supplier requirements address both general features and issues relating to quality, product-specific requirements, environmental management, occupational health and safety, social responsibility, and legal compliance. These requirements are included in standard supply contracts. Suppliers are responsible for complying with relevant legislation and Wärtsilä's requirements. Wärtsilä controls that key suppliers comply with these requirements by using performance indicators and various types of audits. Suppliers must demonstrate their compliance with these requirements in order to receive approved supplier status. The main priorities in Wärtsilä's supplier evaluations are conformance with requirements and performance reviews.

Wärtsilä assesses and manages its key suppliers through its Supplier Management System. Wärtsilä regularly conducts supplier evaluations. These are divided into three categories: pre-assessment, auditing, and performance review. A pre-assessment is made of potential new suppliers before the supplier relationship begins. Audits are conducted for new suppliers of critical components and for suppliers whose performance does not meet Wärtsilä's requirements. Performance reviews are carried out to identify and solve deviations from requirements. In the evaluation of a supplier, Wärtsilä focuses on several critical indicators in which Wärtsilä expects the suppliers to have high standards and performance: compliance with relevant legislation, environmental, occupational health and safety, and quality management, process mapping, risk management, quality plans and social performance.

As part of the supplier evaluation, Wärtsilä conducts a rating based upon Wärtsilä's supplier requirements. This rating is a result of assessment of various information sources, such as pre-qualification questionnaires, dialogue with suppliers, and/or conducted audits.

Based on this rating, the suppliers can be approved, approved with limitations or remarks, or banned. During 2015, 544 suppliers with no valid assessment were rated, and 139 suppliers received a renewal of their rating. By the end of 2015, Wärtsilä has rated 688 of its key suppliers (1,128 overall), and this covers 96% of the total spent on Wärtsilä Supply Management supplies as per set target.

This rating is part of the quarterly supplier reviews conducted by Wärtsilä Supply Management. The rating is reviewed regularly, as are the results of conducted audits.

In 2015, six suppliers were banned because of non-compliance with Wärtsilä's requirements.

Wärtsilä has clear expectations towards its suppliers in terms of compliance with relevant legislation, environmental, occupational health and safety, quality management, and social performance, and strives to ensure the these expectations are met. Wärtsilä develops its supply management system on regular basis.

Economic

Wärtsilä's purpose is to create value for its various stakeholders. The focus is on profitability and raising shareholder value. Achieving this depends on our ability to satisfy the expectations of our other stakeholders as well. These include providing customers with high-quality and environmentally sound products, solutions and services, building long-term partnerships with suppliers, offering employees competitive compensation and working conditions, and contributing to the well-being of the local communities in which we operate. Good economic performance establishes a platform for the other aspects of sustainability – environmental and social responsibility.

Financial implications and other risks and opportunities for the organization's activities due to climate change (G4-EC2)

Wärtsilä Italia S.p.A is the only subsidiary that falls into the scope of the EU Emission Trading Scheme (ETS) because of the heating plant of the factory. The EU ETS has not had any impact on the company's profitability. Wärtsilä's response to climate change is to develop and provide products, solutions, and services that enable our customers to reduce their greenhouse gas emissions. More information about Wärtsilä's solutions for climate change can be found from our website: www.wartsila.com. The potential business risks related to climate change and Wärtsilä's products are presented under the sustainability and climate change risks in the Risk Management chapter of the Governance review.

Coverage of the organization's defined benefit plan obligations (G4-EC3)

The pension cover is based on the legislation and agreements in force in each country. In Finland, most of the pension obligations are covered by the Employee Pensions system (TyEL). The largest defined benefit plans are used in Switzerland, Germany, the UK and Sweden. Most of these defined benefit pension plans are managed by pension funds, and their assets are not included in the Group's assets. Wärtsilä's subsidiaries make their payments to pension funds in accordance with the local legislation and practices in each country. Authorised actuaries in each country have performed the actuarial calculations required for the defined benefit plans. More information on the Group's pension obligations can be found in the Financial Review, Note 22. Pension obligations.

Financial assistance received from government (G4-EC4)

Subsidies received (TEUR)	2015	2014	2013	2012	2011
	9 669	11 486	6 331	5 543	8 263

The value of the subsidies received in 2015 was EUR 9 669 thousand and they were among others related to R&D projects. The most contributing countries in 2015 were Norway, Finland and Spain.

Market presence

Wage levels (G4-EC5)

Wärtsilä applies and follows the local employment legislation in all countries and respects the local collective labour agreements, which often define the minimum wage levels. In addition, entry level salaries are benchmarked against the market references by function and educational qualification. Laws and regulations give the minimum level, but often the actual salaries exceed these levels. A total compensation package is tailored for each country on the basis of corporate rewarding guidelines and local market practices. The base salary is set to meet market conditions, the demands of the job, and individual competence and performance.

Hiring principles (G4-EC6)

In principle, all open vacancies are published both externally and internally ensuring equal opportunity to apply for Wärtsilä positions. If there is no specific reason like a competence transfer need from other countries to hire expatriates to the position, local residents are hired. This principle also applies to senior management. Senior management includes global business and corporate management and local company management positions. Globally, 78% of Wärtsilä's senior management is locally hired, in other words from the same country as the Wärtsilä subsidiary they work for.

Environment

The environmental impacts of Wärtsilä's operations largely relate to manufacturing. The main environmental aspects of manufacturing relate to the use of energy and natural resources and thus also to the emissions that are produced by the manufacturing processes. Product development also requires the testing of products and individual components which, alongside manufacturing, loads the environment. However, the positive impacts of product improvements on the environment far outweigh the negative impacts of testing when taking the product's entire lifecycle into account.

The main reasons for significant fluctuations in certain reported environmental performance indicators from year to year are:

- Changes in production volumes
- Changes in R&D testing programmes
- Changes in company structure (divestments, mergers, and acquisitions)
- Changes in the reporting scope and coverage

Monitoring environmental impacts

Within Wärtsilä, environmental impacts caused by operational activities are monitored as follows:

- Participation in the monitoring of air quality with other local stakeholders
- Measurement of air emissions
- Charting of noise levels
- Periodical effluent analysis
- Soil analysis
- Dispersion analyses and bio-indicator surveys

Materials

Materials used by weight or volume (G4-EN1)

The main materials used in Wärtsilä products are various metals: cast iron, alloy and structural steel, aluminium alloys, and bronze. In 2015, the total material usage was 100,767 tons (88,736). The major material groups were various metals 73% (74), sand 21% (19), and various chemicals 5% (6).

Materials	2015	2014	2013	2012	2011
Total material usage (t)	100 767	88 736	91 720	99 570	98 142
Metals (t)	73 285	65 363	69 991	70 323	65 263
Sand (t)	20 915	16 445	16 537	21 279	23 072
Chemicals (t)	5 025	5 447	3 865	6 730	7 963
Others (t)	1 542	1 481	1 327	1 238	1 844

Percentage of materials used that are recycled input materials (G4-EN2)

The main materials used in Wärtsilä products are various metals: cast iron, alloy and structural steel, aluminium alloys and bronze. Recycled material content of these metals vary depending on the material and supplier in question. Recycled material, such as end-of-life coins and bronze propellers, is used for example in the casting of new propellers.

Energy

Energy consumption within organisation (G4-EN3)

The total energy consumption (in terajoules, TJ) includes the electricity, heat, and fuels used in Wärtsilä companies in recent years. The fuels are used mainly in engine testing, but also in heating, production, and transportation. In 2015 the fuels were from non-renewable sources.

Wärtsilä uses electricity in its manufacturing operations - for example in machining components - and in service workshops and offices. Both

the electrical and the heat energy generated during engine test runs can be utilised. Wärtsilä's aim is to use the electrical energy for its own purposes while also selling part of this electrical energy to local power companies. Due to the nature of engine test runs, the production of electricity, and the company's electricity demand are not equivalent; this allows the surplus energy to be sold to local power companies.

Heating for factories and offices accounts for most of Wärtsilä's consumption of heat energy. In several factories, the heat generated in engine test runs is used for heating. Some factories and offices are connected to a local district heating network, some have their own heating plant, and some use electricity for heating.

Energy	2015	2014	2013	2012	2011
Total energy consumption (TJ)	1 539	1 475	1 613	1 691	1 735
Electricity consumption (MWh)	142 819	140 713	143 833	143 810	145 078
Purchased electricity (MWh)	131 501	131 896	136 098	125 761	129 885
Generated electricity (MWh)	11 318	8 817	7 735	18 007	15 109
Sold electricity (MWh)	21 834	25 548	23 527	22 568	36 893
Heat consumption (MWh)	30 161	25 073	29 077	27 910	31 805
Light fuel oil (t)	4 801	4 461	4 765	5 096	3 409

Natural gas (t)	9 750	8 721	9 806	9 767	10 486
Other fuels (t)	2 834	3 348	4 214	4 025	4 173

Energy intensity (G4-EN5)

Energy	2015	2014	2013	2012	2011
Total energy consumption (TJ)/Net sales	0.334	0.319	0.354	0.406	0.417

Reduction of energy consumption (G4-EN6)

The Wärtsilä Energy Efficiency programme was launched in 2008. The ultimate goal of this programme is to reduce Wärtsilä's energy consumption by at least 10% in terms of absolute consumption (GWh) by 2016 compared to mean energy consumption in 2005. Since the launch of the programme comprehensive energy audits have been carried out in nine most energy consuming countries. The energy audits have revealed the savings potential and measures to improve energy efficiency and have been used as a concrete basis for energy saving actions. These energy saving actions have achieved reductions of energy consumption of various energy types, including electricity, heat and fuels. For the smaller energy consuming companies, Wärtsilä has created tools for identifying the energy saving potentials. By the end of 2015 energy savings of 42.0 GWh have been reached.

Energy savings	2015	2014	2013	2012	2011
Annual energy savings	4.6 GWh	1.9 GWh	15.7 GWh	7.5 GWh	5.9 GWh
Cumulative energy savings	42.0 GWh	37.5 GWh	35.6 GWh	19.9 GWh	12.4 GWh

Water

Total water withdrawal by source (G4-EN8)

Wärtsilä's water consumption can be divided into two categories: domestic use and cooling use. Domestic water is used mainly for sanitary purposes and by industrial equipment, such as machine tools and washing machines. Some factories also use domestic water to produce moulds or to fill in their closed-loop cooling system needs. Wärtsilä uses seawater for its engine and process cooling needs.

Total annual water consumption split by the purpose of use: Out of cooling water about 99% comes from local surface watercourses where only heat is released along with clean water, and about 1% of cooling water comes from municipal water utilities. Out of Wärtsilä's total water consumption in 2015 about 90% was seawater for cooling purposes, about 10% was from municipal water supplies, about 0.3% was directly withdrawn groundwater, and about 0.04% was waste-water re-used from another organisation.

Water	2015	2014	2013	2012	2011
Total water consumption (1 000 m ³)	6 971	7 774	7 534	9 546	9 775
Consumption of domestic water (1 000 m ³)	703	683	744	799	830
Consumption of cooling water (1 000 m ³)	6 268	7 091	6 790	8 747	8 945

Water sources significantly affected by withdrawal of water (G4-EN9)

No water source has been found significantly affected by any Wärtsilä subsidiary water withdrawal.

Percentage and total volume of water recycled and reused (G4-EN10)

Wärtsilä Italia S.p.A. recycled 325,118 m³ of water in 2015 by running it through a water treatment plant and reusing the cleaned water in production processes. The amount corresponds to roughly 113% of Wärtsilä Italia's annual water consumption and 5% of Wärtsilä's total water consumption in 2015. No other major water recycling processes are in use in Wärtsilä production facilities globally.

Emissions

Greenhouse gas (GHG) emissions (G4-EN15-EN18)

In addition to direct CO₂ emissions, Wärtsilä's operations generate indirect CO₂ emissions. In 2015, the calculated secondary CO₂ emissions were 60,317 tons (55,989) (from purchased electricity and heat) and the CO₂ emissions from flights totalled 39,033 tons (39,619).

GHG emissions	2015	2014	2013	2012	2011
Emissions of carbon dioxide (t) (direct) (SCOPE 1)	63 441	57 477	59 631	63 762	68 897
Emissions of carbon dioxide (t) (indirect) (SCOPE 2)	60 317	55 989	57 040	54 011	56 610
Emissions of carbon dioxide (t) (indirect - flights) (SCOPE 3)	39 033	39 619	40 596	39 033	37 459
GHG emissions intensity (all)	35.30	33.10	34.50	37.70	39.10

Reduction of greenhouse gas (GHG) emissions (G4-EN19)

Wärtsilä has taken several measures to reduce its indirect CO₂ emissions. The energy efficiency commitment aims to reduce energy consumption and emissions. In addition, Wärtsilä's focus lies on reducing travelling by implementing a strict travel policy and by using three main virtual meeting concepts: Skype instant messaging, which enables live chats between two people or more, Skype meetings allowing multi-person meetings from personal computers, in which presentation material can be shared, and the Telepresence videoconferencing system. In Wärtsilä, Skype and Telepresence are in everyday use. Approximately 1,300 Skype conferences are arranged daily, and there are 52 video conference rooms in 28 countries and 38 Telepresence rooms established in Wärtsilä premises in 19 countries.

NO_x, SO_x and other significant emissions (G4-EN21)

Air emissions are mainly caused by test runs and the painting of completed engines or other Wärtsilä products. Test run emissions consist of nitrogen oxides (NO_x), sulphur dioxide (SO_x), carbon dioxides (CO₂) and particles, as well as small amounts of other emission components. The painting of engines and other Wärtsilä products generates VOC emissions (volatile organic compounds). Engine emissions are reduced through research and development, as well as product development and testing. These measures also generate emissions, but their results reduce the future emissions of manufactured engines.

Emissions	2015	2014	2013	2012	2011
Emissions of nitrogen oxides (t)	553	519	549	697	765
Emissions of sulphur oxides (t)	63	76	91	145	265
Emissions of total hydrocarbons (t)	145	87	130	180	166

Particulates (t)	9	9	10	13	20
Emissions of VOC (t)	40	40	49	51	58

The primary sources of manufacturing noise are the engine test runs and the ventilation machinery on factory roofs. This noise is mostly low frequency and is therefore not easily detected by the human ear. Wärtsilä has specifically addressed the issue of noise protection using technical means and has succeeded in lowering noise levels considerably. However, noise abatement is a continuous need and requires regular monitoring.

Effluents and waste

Total water discharge by quality and destination (G4-EN22)

Wärtsilä uses seawater for its engine and process cooling needs, in which case the cooling water system is kept separate so that only heat is released into the natural water system. Wastewater is sewered and piped to the local wastewater treatment plant or treated on site before being discharged. If the effluent is not suitable for discharge, it is taken away for appropriate processing, for example to a special treatment plant for hazardous wastes.

Several Wärtsilä subsidiaries have environmental permits allowing clean or properly treated water discharge into natural water bodies. Most of this discharge is clean cooling water released back into local surface watercourse, where only heat is released.

In 2015, the total amount of water discharge was 6,881,130 m³.

2015 water discharge	Municipal sewer	Sea	River	Ground
Amount (m ³)	304 941	6 244 650	330 610	929
% of total water discharge	4%	91%	5%	0%

Total weight of waste by type and disposal method (G4-EN23)

Manufacturing activities cause various wastes. These are divided into two main categories: hazardous and non-hazardous wastes. Hazardous wastes include cutting fluids, various types of waste oil, paints and solvents, oily wastes, solid wastes etc. Non-hazardous wastes include scrap metal, metal swarf, waste plastics, waste wood, domestic waste, cardboard and paper waste. All Wärtsilä companies sort their waste according to local municipal regulations. Generally speaking, the main sorting categories are waste to be incinerated, waste for landfills, and waste for recycling.

Waste management in Wärtsilä has four aims, listed in their order of priority:

- to reduce the amount of waste generated in processes
- to use waste as a material
- to use waste as energy
- to dispose of waste in an environmentally sound way

Waste	2015	2014	2013	2012	2011
Total waste (t)	52 037	46 829	44 741	62 517	85 153
Non-hazardous waste (t)	44 864	39 409	33 623	39 512	42 865
Hazardous waste (t)	7 173	7 420	11 118	23 005	42 288
Waste for landfills (t)	8 593	9 621	16 875	21 988	27 808
Waste for recycling (t)	34 074	27 328	14 622	15 423	12 444
Waste for incineration (t)	2 197	2 460	2 125	2 101	2 614
Hazardous waste for landfills (t)	2 586	2 504	6 360	17 376	38 054
Hazardous waste for recycling (t)	3 502	3 792	2 796	3 200	2 082
Hazardous waste for incineration (t)	1 084	1 124	1 963	2 429	2 152

Products and services

Extent of impact mitigation of environmental impacts of products and services (G4-EN27)

Environmental products and services are the most important means for Wärtsilä to mitigate the environmental impacts. Wärtsilä has a key role in providing environmentally sound solutions and services that enable our customers to develop their business in a sustainable way. The value of sustainable innovation is delivered across a wide range of environmentally sound products and solutions, including technologies related to efficiency improvement, reduction of gaseous and liquid emissions, effluent and ballast water treatment, as well as to products and solutions that are flexible, efficient, reliable, safe, cost-efficient to operate, and that have minimal environmental footprint throughout their lifecycles.

Expenditures

Total environmental protection expenditures and investments by type (G4-EN31)

Concerning Wärtsilä's operations, we have defined expenditures as environmental expenditures if they are related to soil, water and air pollution control, waste management, environmental management, or noise control.

A substantial proportion of the company's investments in product development are targeted at securing environmental compliancy providing short- and long-term benefits for the whole value chain and ultimately for the environment.

Expenditures	2015	2014	2013	2012	2011
R&D costs (MEUR)	132	139	185	188	162
Environmental costs					
Environmental capital expenditures (MEUR)	0.5	1.9	0.6	0.8	0.9
Environmental operating expenditures (MEUR)	4.6	4.8	5.1	6.3	6.1

Social

Wärtsilä's aim is to provide the best value and service to our customers by continuously developing our competencies and way of working. The strategic goal of Wärtsilä's social responsibility and people strategy is to bring the business strategy alive by developing Wärtsilä's organisation and competencies to meet the evolving business needs.

Our aim is to have energetic, competent, and motivated personnel with exciting and meaningful jobs and career opportunities led by excellent leaders. We recognise good performance and respect diversity. We also endeavour, by applying high standards of occupational health and safety, to offer a hazard-free workplace to our employees, contractors, and others working in different parts of the corporation.

Good corporate citizenship is accomplished through active co-operation, open communication, and good relationships with our stakeholders. Wärtsilä's operations and relations with its stakeholders are based on the company's Code of Conduct, with which each Wärtsilä company and individual is required to comply.

Structural changes in 2015 (G4-13)

In January 2014 Wärtsilä started a process to realign its organisation to secure future profitability and competitiveness. The Group-wide efficiency programme was expected to lead to a reduction of approximately 1,000 employees globally, of which about 200 were planned to be in Finland. Wärtsilä completed the programme during 2015, and achieved annual savings of EUR 60 million. The personnel reductions were implemented following the local consultation processes in the affected countries according to local practices and legislation. The company has provided support and consultation as well as assistance in re-employment in the impacted countries.

Wärtsilä and China State Shipbuilding Corporation (CSSC) reached an agreement to join forces in a new joint venture based on Wärtsilä's 2-stroke engine business. The joint venture is owned 70% by CSSC and 30% by Wärtsilä. Responsibility for servicing Wärtsilä 2-stroke engines remains with Wärtsilä Services. The basis of the agreement is to take advantage of the synergies between two strong partners, thereby enhancing Wärtsilä's share of the 2-stroke marine engine market. The JV was established and fully operationally effective 19 January 2015 and it employs 330 employees in Switzerland, China, South Korea and Japan.

In December 2014 Wärtsilä Corporation announced the acquisition of L-3 Marine Systems International from NYSE-listed L-3 Communications Holdings Inc. The acquisition was closed in May 2015 and the integration programme in order to establish a global Electrical & Automation business line within Marine Solutions division started immediately after closing. At the time of acquisition, MSI had more than 1,700 employees in 38 locations in 14 countries.

On 17 July 2015 Marine Solutions (former Ship Power) announced a plan to realign its organisation, operations, and resources in response to the sluggish global marine market situation. These plans affect personnel in all functions of Wärtsilä Marine Solutions' global operations. The realignment will mean the reduction of approximately 600 jobs globally. The aim was to reduce 160 jobs in Finland. As a result of the negotiations, the redundancy need was confirmed to be 110 permanent employees in Finnish Marine Solution operations. It was possible to decrease the number of redundancies since also temporary layoffs were agreed upon in the negotiations. The Marine Solutions realignment plan will be completed in 2016.

Employment

Personnel in 2015 (G4-10, G4-11, G4-LA1, G4-LA12)

In addition to direct employment, Wärtsilä employed also indirectly an external workforce totalling 3,946 man-years in subcontracting at its factories and units. The units located in Finland had a total personnel of 3,531 employees.

All in all, 2,421 employees left and 1,641 joined Wärtsilä globally during 2015 for different reasons. Wärtsilä had 18,856 employees at the end of 2015.

Benefits provided to full-time employees that are not provided to temporary or part-time employees (G4-LA2)

In general, temporary and part time employees are offered the same benefits as permanent employees. In some countries, eligibility is linked to months or years of service – such differences being typically based on collective agreements according to local legislation.

Labour/management relations

Minimum notice periods regarding operational changes (G4-LA4)

Wärtsilä way of working concerning minimum notice periods is described in the Employee Practices section.

Occupational health and safety

Percentage of total workforce represented in formal joint management-worker health and safety committees (G4-LA5)

Wärtsilä companies apply occupational health and safety programmes as required by local legislation, which are normally developed by occupational health and safety committees consisting of representatives of the companies' management and personnel. Altogether 78% of Wärtsilä companies have an occupational health and safety committee covering 93% of Wärtsilä's employees.

Type of injuries and rates of injuries, occupational diseases, lost days and absenteeism, and total number of work-related fatalities (G4-LA6)

The positive trend in reducing lost time injuries continued. Wärtsilä achieved a good result in 2015, with a lost time frequency index of 18% below that of the previous year. There has been a continual lost time injury frequency reduction since year 2008.

However, Wärtsilä regrets to report that one Wärtsilä employee lost his life in a fatal accident. The employee got caught between two gears of machinery during mechanical assembly operation in Lithuania and died on the scene. This fatality is under investigation by the authorities and Wärtsilä. The deceased was a male employee.

Injuries	2015	2014	2013	2012	2011
Total number of injuries	461	510	730	742	987

Fatalities					
Number of fatalities, total	1	5	1	0	1
Employees	1	3	1	0	1
Contractors	0	2	0	0	0

Workers with high incidence or high risk of diseases related to their occupation (G4-LA7)

Wärtsilä employees constantly work close to the running engines while conducting overhaul operations or testing engines, which exposes them to high levels of noise. Wärtsilä has occupational safety and health programmes in place to prevent hearing loss, including providing hearing protectors to those employees under risk of hearing loss.

Training and education

Average hours of training per year (G4-LA9)

Wärtsilä's average number of training days in 2015 for male employees was 3.1 and for female employees 2.2.

Training days/employee	2015	2014	2013	2012	2011
All employees	3.0	4.2	4.1	3.4	3.0
Managers and superiors	3.5	5.1	4.6	3.3	3.4
Other white-collar employees	2.9	3.5	4.1	3.9	2.5
Blue-collar employees	3.1	4.4	3.6	3.0	3.4

Programmes for skills management and lifelong learning (G4-LA10)

Wärtsilä programmes for skills management is described in People Management section. Wärtsilä offers a wide variety of internal training courses for its employees, covering over 20 training categories. These include topics like engine technology, health and safety, language and culture, project management, environment, security, and leadership.

Percentage of employees receiving regular performance and career development reviews (G4-LA11)

Coverage %	92	92	91	84	89

Diversity and Equal opportunity

Composition of governance bodies and breakdown of employees (G4-LA12)

A diverse workforce generates higher profits, better complex problem-solving skills, and access to a larger talent pool. Wärtsilä's Diversity Initiative began in 2012 and aims to drive an inclusive corporate culture at all levels to meet global requirements in the corporation. By investing in diversity and supporting employees of varied gender, age, personality, and educational background, Wärtsilä becomes a more innovative business partner as well as a more attractive employer.

Gender diversity	2015	2014	2013	2012	2011

Product and Service Labelling

Results of surveys measuring customer satisfaction (G4-PR5)

In order to put the needs of customers always first, Wärtsilä carefully listens and acts upon customer feedback, at both operative and management levels. Wärtsilä places great emphasis on earning long-term customer trust through keeping its promises. While challenges may arise at any time in this business, relationships are strengthened by focusing on customer satisfaction and loyalty.

Customer feedback on project deliveries and the operation of their installations, is welcomed. To know what works and where to improve, as well as understanding the customers' operational environments, is critical in developing the company's products and services. To ensure customer satisfaction, their feedback is systematically reviewed and the needed actions are taken. In addition, Wärtsilä collects feedback during different events, activities, and interactions with its customers.

Compliance

Wärtsilä is committed to carrying out its business in a sustainable way. In order to promote the long-term interests of Wärtsilä and its stakeholders, the company strives to maintain the highest legal and ethical standards in all its business practices. All business and other activities of Wärtsilä shall be carried out strictly in compliance with all applicable laws and under the principles of good corporate citizenship in each country where such activities take place. This requires all employees to act responsibly and with integrity and honesty.

Wärtsilä is committed to ensure compliance with Wärtsilä Code of Conduct in all of its business operations globally and therefore has established a group policy for reporting misconduct incidents and suspected Code of Conduct violations. Wärtsilä employees are encouraged to voice their concerns as to potential violations of the Code and its underlying policies and instructions. The reported misconduct cases are investigated either locally or centrally, as appropriate. The

primary way to report suspect misconduct incidents is through the line management but employees also have alternative reporting routes, including anonymous reporting, directly to the compliance function, or to legal affairs. In the event a suspected violation involves the top management of Wärtsilä Corporation, or the suspected case is believed to be significant, the Audit Committee of the Board of Directors of Wärtsilä Corporation may be contacted directly. An employee who reports a potential Code of Conduct violation in good faith shall suffer no harassment, retaliation, or adverse employment consequences. Finally, Wärtsilä employees are instructed to seek advice on ethical and lawful behaviour and in the matters of integrity from Wärtsilä legal counsels or from the compliance function.

Environmental compliance

Wärtsilä companies comply with all local environmental legislation. The operations of Wärtsilä's manufacturing companies require a valid environmental permit, the terms of which are generally met. Incidents of non-compliance are described in the following chapters.

Environmental disturbances (G4-EN24) and complaints (G4-EN34)

The number of disturbances, complaints, and incidents of non-compliance are presented in the table below. Reported disturbances typically cover incidents in which the Wärtsilä company concerned has been obliged to report the disturbance to the authorities.

The main environmental disturbances that occurred in Wärtsilä's business locations in 2015 were two oily water spills and a soot spill. These disturbances were investigated and the appropriate corrective actions to minimise the impact on the environment were taken in each case. There were also two complaints made by occupants of the neighbouring property related to noise. The complaints were investigated and the noise levels promptly normalised.

Cases of non-compliance (G4-EN29)

Wärtsilä India Pvt. Ltd. reported a case of a temporarily non-operational effluent treatment system at its manufacturing unit in Khopoli, and received a fine of EUR 3,600 for the non-compliance. Necessary actions are ongoing to achieve compliance with the relevant regulation as quickly as possible.

Wärtsilä de Mexico S.A. was fined EUR 1,851 for missing a hazardous waste log in an environmental agency inspection.

Wärtsilä Hungary Kft received a notice from the authorities of non-compliance with safety regulations resulting from storing oil in an unsuitable container.

Disturbances, complaints, and non-compliances	2015	2014	2013	2012	2011
Environmental					
Disturbances	3	11	5	3	6
Non-compliances	3	1	2	2	6
Complaints	2	1	1	7	5
Social					
Non-compliances	4	1	4	3	4
Fines of non-compliance cases (EUR)	30 111	9 824	9 787	45 079	7 869

Human and labour rights compliance (G4-LA16, G4-HR3, G4-HR4, G4-HR5, G4-HR6, G4-HR12, G4-SO8, G4-SO11)

Wärtsilä supports and respects basic human values as outlined in the UN's Universal Declaration of Human Rights. Wärtsilä also supports the Ten Principles of UN Global Compact, of which six principles are related to Human and Labour rights.

Wärtsilä's employees represent 131 nationalities. The company supports fair and equal treatment of all its employees. Wärtsilä supports the work-related rights defined by the International Labour Organization (ILO), and works, therefore, to ensure that there is freedom of association and the right to collective bargaining in the company. In those countries where local legislation does not recognise these rights, Wärtsilä endeavours to give employees other channels for expressing their opinions.

Wärtsilä does not accept the use of forced labour or child labour in any form. Wärtsilä is unaware of any cases of human rights being breached, discrimination, infringements of rights at work, or the use of forced or child labour. During the reporting period the following misconducts were realised:

Wärtsilä Korea Ltd. was charged a penalty fee of EUR 20,438 for not fulfilling its legal obligation to hire six disabled persons. The company has mainly hired blue collar employees, which limits the suitable job offerings to disabled persons.

Wärtsilä Brasil Ltda received a notice of violation for not having a compulsory Health and Safety committee at a power plant under an Operations & Maintenance agreement. A fine is also expected to follow.

Wärtsilä Brasil Ltda has filed an appeal against several claims relating to non-compliances with labour laws in its Manaus facility that allegedly arose during a routine inspection by the Ministry of Labour.

Wärtsilä L.L.C. (UAE) received a fine of EUR 4,222 for failing to arrange compulsory occupational health cards to all relevant employees. Action was promptly taken to ensure compliance.

Preventing corruption and bribery (G4-SO5)

In May 2009, a former senior manager of Wärtsilä Finland Oy was charged before a court of first instance in Finland with bribery, allegedly committed in aggravated circumstances. The charges related to a consulting agreement concluded in 1997 in connection with a power plant project in Kenya. Subsequently, in October 2009, Wärtsilä Finland Oy, which was the Wärtsilä contracting party and the former employer of the senior manager, was charged with the aggravated giving of a bribe (corporate criminal liability), for which the prosecution demanded that Wärtsilä Finland Oy be ordered to pay a corporate fine. Both the senior manager and Wärtsilä Finland Oy regarded the charges as unfounded. Wärtsilä cooperated with the investigation authorities throughout the investigation. On 18 December 2009, the court of first instance in Finland dismissed all the charges and demands. After a lengthy appeals process for reasons of procedural law, the case was referred back to the court of first instance for a new hearing as no evaluation of the evidence had been conducted earlier. On 21 March 2013, the Pohjanmaa district court, being the court of first instance to hear the case for the second time, rendered its verdict. The court dismissed the charges against Wärtsilä Finland Oy but sentenced the former senior manager to a suspended prison term of 1 year 6 months on the charge of aggravated bribery. The Vaasa Court of Appeal, by unanimous decision, overruled the verdict by the Pohjanmaa District Court by finding the former senior manager of Wärtsilä Finland Oy not guilty of aggravated bribery. The Court of Appeal thus dismissed all the charges against both the individual and Wärtsilä Finland Oy. The prosecution submitted a petition for leave to appeal to the Supreme Court but, by its decision of 3 February 2015, the Supreme Court did not grant such leave to appeal. The Vaasa Court of Appeal's decision thus remains final.

Political lobbying (G4-SO6)

During 2015, Wärtsilä did not make any contributions to political parties.

Competition regulation (G4-SO7)

Wärtsilä arranged, as it has earlier, a number of competition law training seminars in 2015 for relevant personnel in order to further promote their knowledge of competition laws, and thus ascertain full compliance with such laws.

Product responsibility (G4-PR2, G4-PR4, G4-PR7, G4-PR8, G4-PR9)

During the review period, no instances of non-compliance related to product liability or customer privacy were identified.

Report profile

Data collection

The data on the products' environmental performance is based on measured test results. Performance data on the environmental and social aspects of sustainability has been collected from the Wärtsilä companies using a detailed questionnaire. Economic performance data is based mainly on audited financial accounts.

The sustainability data is collected and reported according to Wärtsilä's specific internal reporting guidelines that include all the definitions and instructions necessary for this purpose. Environmental expenditure and investments are reported applying the Eurostat instructions.

Each company has a nominated individual responsible for collection and consolidation of the data, and for its quality and reliability. The management of each company approves the data before it is consolidated at the Group level. The companies report their sustainability data using Wärtsilä's CSM reporting system. The reported data is checked at both local and Group levels before its consolidation. The content of this Sustainability Report was reviewed and approved by Wärtsilä's Board of Management.

Report assurance

KPMG Oy Ab has independently assessed the report against GRI principles for defining content and quality. As part of the assurance process, KPMG assesses local level data management and processes, evaluates the relevance and reliability of the data reported to headquarters, and assesses whether the reporting guidelines of Wärtsilä are well understood and applied. This is achieved through conducting site visits and videoconferencing. Site visits were carried out in China by visiting Wärtsilä China in Shanghai, Wärtsilä Suzhou in Suzhou, and Wärtsilä Propulsion (Wuxi) in Wuxi. Wärtsilä Iberica, Wärtsilä Deutschland, Wärtsilä Korea, and Wärtsilä Oil and Gas Systems were assessed through videoconferencing.

Materiality assessment

Identified material aspects and boundaries

Entities included in the organization's consolidated financial statements (G4-17)

The entities included in Wärtsilä's Consolidated Financial Statements are listed in the [Notes to the Consolidated Financial Statements 32. Subsidiaries](#).

All the Group companies are included in Wärtsilä's Sustainability reporting. The report covers Wärtsilä's businesses. At the company level, the report includes the parent company and its subsidiaries as well as its manufacturing, service and sales units. The report excludes Wärtsilä's associated companies, joint ventures, and supply chain companies.

Process for defining report content and aspect boundaries (G4-18)

Wärtsilä's Sustainability Reporting 2015 is prepared according to the GRI (Global Reporting Initiative) sustainability Reporting Guidelines (G4) and the Reporting Principles for Defining report content. This report has been prepared in accordance with the G4 sustainability reporting procedures defined by the Global Reporting Initiative (GRI). The report corresponds to the 'Comprehensive' level in the G4's reporting framework. This means that our reporting covers all the Standard Disclosures of the G4 framework and all the sustainability aspects we have identified as material in our operations.

In 2014, Wärtsilä updated the assessment of material sustainability topics. The process included an assessment of economic, environmental, and social aspects from the stakeholders' point of view and as an impact to Wärtsilä's business. Stakeholder views were collected through a questionnaire answered by 96 key stakeholder contacts in various Wärtsilä units and functions worldwide. The aim of the stakeholder questionnaire was to evaluate how important different sustainability aspects are for assessments and decision-making of Wärtsilä's stakeholders. Sustainability aspects for the stakeholder evaluation were identified based on Wärtsilä's previous experience on material sustainability topics, industry peer review, and analysis of significant economic, environmental and social impacts in Wärtsilä's value chain. Focus on stakeholder assessment was in investors and financiers, major customers, personnel, local societies, and media.

The significance of identified aspects was then analysed as a current or potential business impact on Wärtsilä. The business implications of identified sustainability aspects were evaluated based on direct financial impacts as well as risks and opportunities. In addition the level of internal policies or practices were used as an indication of potential business impact.

As a result of the materiality assessment, the following aspects were identified as material for Wärtsilä:

- Environmental impacts of Wärtsilä's products and services
- Compliance with laws and regulations
- Economic impacts to stakeholders
- Personnel skills and development
- Anti-corruption and –bribery, and
- Occupational health and safety

In addition to the identified material aspects Wärtsilä discloses sustainability data on several other areas, because they are frequently asked by Wärtsilä's stakeholders or they are considered important on the basis of continuity of sustainability reporting.

Aspect boundaries for the identified material aspects were then evaluated in reflection to the sustainability context that is based on the significance of their economic, environmental, and social impacts in our value chain. A more detailed description of the aspect boundaries and completeness of data collection for the identified material aspects can be found in the G4-20 Aspect boundary within the organisation and G4-21 Aspect boundary outside the organisation.

Material aspects (G4-19)

From a sustainability impact point of view, product-related environmental issues are the most significant for Wärtsilä. The use of Wärtsilä's products has an environmental impact both locally and globally. Other dimensions of sustainability mainly have a local impact.

SUSTAINABILITY IMPACT	LOCAL	GLOBAL
Economic	•	
Environmental		
- Product related	•	•
- Operational	•	
Social	•	

The following GRI G4 aspects have been identified as material for Wärtsilä's sustainability reporting:

Category	Aspects	Identified material aspect for Wärtsilä, reported in accordance with GRI G4	Other aspects included in Wärtsilä Sustainability Reporting	Excluded from Wärtsilä Sustainability Reporting*
Economic	Economic performance	•		
	Market presence		•	
	Indirect economic impacts			•

Customer privacy			•
Compliance	•		

* Several Compliance-related indicators under the excluded GRI aspects have also been included in the reporting in order to supplement a comprehensive description of the overall importance of compliance to Wärtsilä.

Wärtsilä's sustainability reporting provides a full standard disclosure of the management approach and performance indicators defined by the GRI G4 Guidelines.

Aspect boundary within the organisation (G4-20)

The aspect boundary for the material aspects is all Wärtsilä companies. The economic performance data covers all Wärtsilä companies. The data on environmental and social performance covers all Wärtsilä companies except the following:

- Wärtsilä Operations Guyana Inc.
- Wärtsilä Yuchai Engine Co. Ltd.
- Wärtsilä Egypt Power S.A.E
- Wärtsilä Tanzania Ltd.
- Wärtsilä Muscat LLC
- L-3 Marine Systems International's units, acquired during the financial period 2015:
 - Funa International Oy
 - Wärtsilä SAM Electronics Nederland B.V.
 - Wärtsilä JOVYATLAS EUROATLAS GmbH
 - Wärtsilä ELAC Nautik GmbH
 - Wärtsilä SAM Electronics GmbH
 - Wärtsilä FUNA International GmbH
 - Wärtsilä APSS Srl
 - Wärtsilä Lyngsø Marine A/S
 - Wärtsilä Valmarine AS
 - Wärtsilä FUNA International Inc.
 - Wärtsilä Dynamic Positioning Inc.
 - Wärtsilä SAM Electronics (Taizhou) Co. Ltd.
 - Wärtsilä Marine Systems Korea Co Ltd.

These companies will be included in Wärtsilä's sustainable development reporting in the forthcoming years. Wärtsilä's Sustainability Reporting is an integrated part of its annual reporting, and therefore Wärtsilä publishes its sustainability data annually.

Coverage of operational data

Operational data, % of Wärtsilä companies

	2015	2014	2013	2012	2011
Economic	100	100	100	100	100
Environmental	83	94	93	79	92
Social	100	100	93	79	92

Operational data, % of personnel

	2015	2014	2013	2012	2011
Economic	100	100	100	100	100
Environmental	91	98	99	94	98
Social	100	100	99	94	98

Operational data, % of product manufacturing

	2015	2014	2013	2012	2011
Economic	100	100	100	100	100
Environmental	95	100	99	93	100
Social	100	100	99	93	100

Aspect boundary outside the organisation (G4-21)

Wärtsilä's Sustainability Report does not cover performance data collected outside the Group companies.

Explanation of the effect of any re-statements of information provided in earlier reports (G4-22)

There are no major restatements of information provided in previous reports.

Significant changes from previous reporting periods (G4-23)

There are no significant changes from previous reporting periods in the reporting scope and aspect boundaries. Historical data covers all entities that were part of the Group at the end of each reporting period.

Reporting principles

Economic performance data

The economic performance data is based on audited financial accounting and covers all Wärtsilä subsidiaries unless otherwise stated.

Donations: The data of this indicator included 15 major Wärtsilä subsidiaries and the parent company in 2015.

Subsidies: The data of this indicator included all Wärtsilä subsidiaries and the parent company in 2015.

The social costs for employees contribute to the funding of pensions, unemployment, and other social benefits that provide security and improve the quality of life for the company's employees and their families.

Senior management includes all employees with the highest job grade levels 10-15. At the end of 2015 this covered 443 employees.

Environmental performance data

Materials include all the major material flows used in the production processes globally. The most material consuming product categories include engines, propellers, and propulsion systems.

Total energy consumption includes both direct and indirect energy usage. The direct energy usage includes the fuels used by Wärtsilä subsidiaries. Lower heating values (LHV) are used to calculate the energy consumption of fuels in joules. LHVs are based on information supplied by vendors or results of fuel analysis. The indirect energy usage includes the purchased electricity and heat. Since the efficiency of purchased electricity and heat generation is not known, the energy conversion is done directly from the purchased values.

Fuel consumption data is based on either invoices or measured values.

Heat and electricity data is based on either invoices or measured values.

Energy intensity describes the ratio of total internal energy consumption divided by the total net sales of the subsidiaries included in the data gathering in a particular year.

GHG emissions intensity describes the ratio of total greenhouse gas emissions divided by the total net sales of the subsidiaries included in the data gathering in a particular year.

Reduction of energy consumption data is based on energy efficiency actions, which are based on the results of third-party energy audits. Energy audit reports include proposed energy saving actions with calculated energy saving potentials per action item.

Water consumption: The reported figures are based on either measured values or invoices. The cooling water usage might also be calculated from the heat load in some units.

Recycled water: The reported amount is the total measured recycled water used in Wärtsilä Italia S.p.A. Their water treatment plant provides reusable water for manufacturing processes.

Water consumption: The reported figures are based on either measured values or invoices. The cooling water usage might also be calculated from the heat load in some units. The water sources have been specified based on a detailed questionnaire for each Wärtsilä subsidiary.

Water discharge: The reported figures are based on either measured values or invoices. The cooling water discharge might also be calculated from the heat load in some units. The water discharge destinations have been specified based on a detailed questionnaire for each Wärtsilä subsidiary.

Emissions: The reported figures are mainly based on measured values, based on which specific emission factors are determined. The specific emission factors are determined for various fuels and engine types. The emissions of the heating boilers are either measured or calculated. The emissions of vehicles are calculated by using the VTT (Technical Research Centre of Finland) Lipasto database emission factors. The indirect CO₂ emissions (scope 2) are calculated by using the emission factors from the GHG Protocol. The CO₂ emissions of air travel are based on calculations by Wärtsilä's travel agency and are based on DEFRA (the UK government Department for Environment, Food and Rural Affairs) defined factors. GWP factor used for converting methane emissions to CO₂-equivalent is 25.

Environmental disturbances: As such are considered major incidents, which generally require communication to local authorities.

Social performance data

Total number of injuries: The reported figures include all types of reported work-related injuries, as well as commuting injuries and possible fatalities.

Lost time injuries: The reported figures include all reported work-related injuries resulting in absence from work of at least one day.

LTI frequency is expressed as reported lost time injuries and possible fatalities per million working hours. The working hours are actual paid working hours. The lost time injury rate does not include commuting injuries.

Net employment creation is calculated by deducting the number of permanent employees having left the company for any reason from the amount of newly hired permanent employees during the reporting period.

Employee turnover is calculated from permanent employees. The number of resigned permanent employees is divided by the number of permanent employees at the beginning of the reporting period.

Independent Assurance Report

To the Board of Management of Wärtsilä Oyj Abp

We have been engaged by the Board of Management of Wärtsilä Oyj Abp (hereafter: Wärtsilä) to provide limited assurance on Wärtsilä's Sustainability Information in the electronic Wärtsilä Annual Report 2015 from the reporting period 1.1.–31.12.2015.

The sustainability information subject to the limited assurance engagement (hereafter: the Sustainability Information) includes data and text presented in the following sections presented in Wärtsilä's Annual Report:

- The "Sustainability" -section and its sub-sections
- The following sub-sections of the "This is Wärtsilä" –section: "CEO review", "Wärtsilä in Brief", "Corporate strategy", "Sustainability targets", "Value of sustainable innovations", "Sustainability highlights", "Energy Solutions and Sustainability", "Marine Solutions and Sustainability", "Services and Sustainability" and "Research and Development"
- The GRI-G4 indicators included in the Governance section
- The data and text in the "Stories" section specifically marked with "Sustainability Assured 2015".

The Board of Management of Wärtsilä is responsible for the preparation and presentation of the Sustainability Information in accordance with the Global Reporting Initiative (GRI) Sustainability Reporting Guidelines G4.

Our responsibility is to carry out a limited assurance engagement and to express an independent conclusion on the information subject to the assurance. We have conducted the engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 (Assurance Engagements other than Audits or Reviews of Historical Financial Information). We apply the international quality standard ISQC1 and accordingly maintain a comprehensive system including documented policies and procedures. We also comply with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants. We do not accept or assume responsibility to anyone other than Wärtsilä for our work, for this assurance report, or for the conclusions we have reached.

Limitations of the engagement

Data and information related to sustainability are subject to inherent limitations applying to data accuracy and completeness, which are to be taken into account when reading our assurance report. The presented Sustainability Information is to be considered in connection with the explanatory information on data collection, consolidation and assessments provided by Wärtsilä. Our assurance report is not intended for use in evaluating Wärtsilä's performance in executing the sustainability principles Wärtsilä has defined. To assess the financial position and performance of Wärtsilä, the Wärtsilä audited Financial Statements for the year ended 31 December 2015 is to be consulted.

The work performed in the engagement

Our assurance procedures are designed to obtain limited assurance on whether the Sustainability information is presented in accordance with the *Global Reporting Initiative (GRI) Sustainability Reporting Guidelines G4* in all material respects. A limited assurance engagement consists of making inquiries, primarily of persons responsible for the preparation of the sustainability information presented, and applying analytical and other evidence gathering procedures,

as appropriate. The evidence gathering procedures mentioned above are more limited than for a reasonable assurance engagement, and therefore less assurance is obtained than in a reasonable assurance engagement.

In our engagement we have performed the following procedures:

- Interviews with two members of senior management to reassert our understanding of the connection between Wärtsilä's sustainability procedures and Wärtsilä's business strategy and operations as well as sustainability objectives;
- An assessment of the Sustainability Information's conformity with the principles of the G4 guidelines for defining content and reporting quality;
- An assessment of coverage of the material aspects selected for the Sustainability Information and the definition of reporting boundaries in the context of Wärtsilä's business operations and sector;
- An assessment of data management processes, information systems and working methods used to gather and consolidate the presented Sustainability Information, and a review of Wärtsilä's related internal documents and guidelines;
- Comparison of Sustainability Information to underlying rules of procedure, management and reporting systems as well as documentation;
- A review of the presented Sustainability Information, including the performance data and assertions, subject to the engagement, and an assessment of information quality and reporting boundary definitions;
- Assessment of data accuracy and completeness through a review of the original numerical information received from Wärtsilä's subsidiaries as well as through samples the Group's information systems;
- Assessment of the local reporting processes of Wärtsilä's subsidiaries on a sample basis through a three site visits and four video conferences, conducted to Wärtsilä sites selected on the basis of a risk analysis taking into account both qualitative and quantitative information.

Conclusions

Based on the assurance procedures performed, nothing has come to our attention that causes us to believe that the information subject to the assurance engagement is not presented in accordance with the *Global Reporting Initiative (GRI) Sustainability Reporting Guidelines G4* in all material respects.
