# WÄRTSILÄ INDUSTRIAL OPERATIONS FOOTPRINT NOW AND IN THE FUTURE LARS HELLBERG

**GROUP VICE PRESIDENT, WÄRTSILÄ INDUSTRIAL OPERATIONS** 

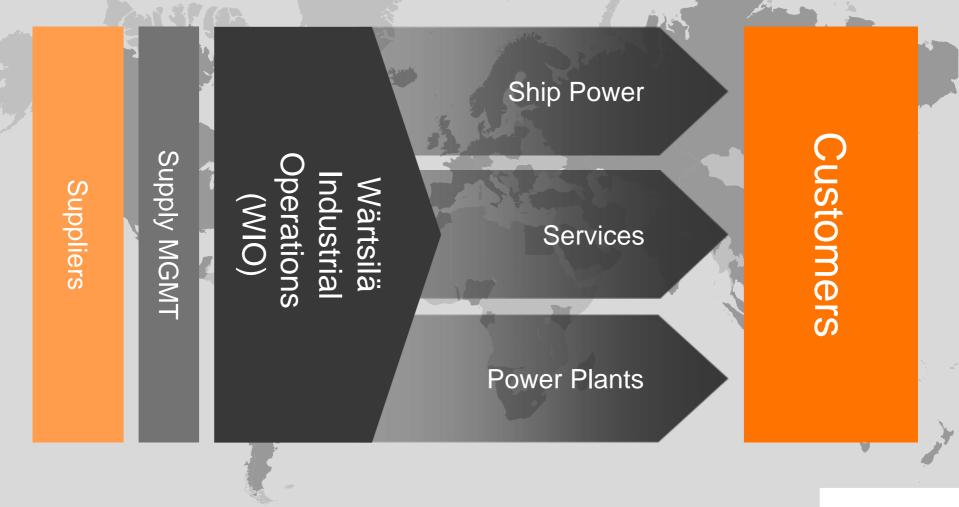

1 © Wärtsilä 24 March 2010 LARS HELLBERG

### Wärtsilä Corporation - Organisation

## **Our industrial challenge**

#### The markets are volatile and require flexibility Wärtsilä meets external performance pressures effectively

- Increasing requirements on quality, delivery and cost and to deliver as promised
- Main market location shifting (customer presence in Asia)
- New industry cost-level (reduction by 10-30%)
- Increased environmental demands
- Increased pressure throughout the supply chain

A sustainable profitable growth for Wärtsilä

• 2009: WIO plans next moves

- New momentum to secure flexibility
- 2008 Market downturn
- 2006: Wärtsilä expands into Automation
- 2006: Market upturn much greater than expected
- 2005: Expansion into Asia

2008

- 2005: Clear market upturn
- 2004: Closed Turku factory, sold Mulhouse factory and intellectual property
- 2003: Wärtsilä volumes at lowest point
- 2002: Wärtsilä expands with Propulsion

2005

• 2001: Layoffs in Italy, sold welded part operations Trieste, closed Zwolle factory

2000: Market downturn

2003

Key data Wärtsilä 2004 Net sales 2.4 B€ EBIT 4.6 % People 11,000 #

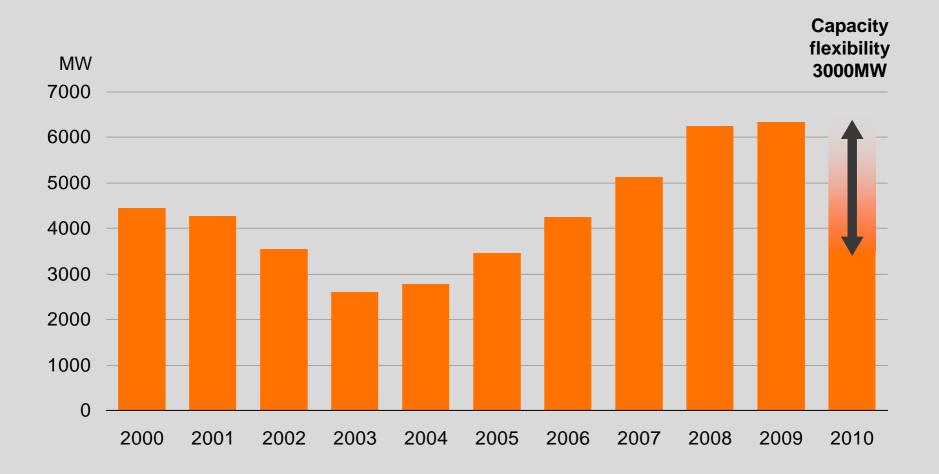

Key data Wärtsilä 2009 Net sales 5.3 B€ EBIT 12.1 % People 18.500 #

2000

WÄRTSILÄ

Flexibility is obtained from people, outsourcing, supply chain optimisation and streamlining of manufacturing foot print

## Wärtsilä's current manufacturing capacity

**Norway**, 390 employees Propellers, gears, propulsion controls, R&D, power drives, power distribution, vessel automation Finland 1,430 employees Engine manufacturing, R&D

**UK**, 180 employees Seals, synthetic bearings, R&D

**The Netherlands**, 530 employees Propellers, thrusters, propulsion controls, R&D, DTS – Component Machining unit

Switzerland, 270 employees R&D and licensing **Spain**, 70 employees Engine manufacturing, R&D, blades, propellers Italy 890 employees Engine manufacturing, R&D India, 130 employees Gears, propellers, components, auxiliary engines

**China**, 1,130 employees Low-speed engines, thrusters, components, seals, bearings auxiliary engines, propellers, shaft lines, blades and hubs

> Japan 170 employees Seals, bearings

South Korea 30 employees Engine manufacturing

Number of employees December 31, 2009: 4,900 in Industrial operations, 18,541 Wärtsilä total

70-80% in Europe, 20-30% in Asia

### Wärtsilä in China

WÄRTSI

- Local provision of competences as a service provider in a global network
- Operational engineering activities\* are brought close to the customers
  - Better engineering support for customers
  - Closely located to local manufacturing
  - Local operational functions for application engineering, quality, problem solving, supplier development, product localisation and production support and development.
  - Shorter information loop to serve running projects
  - Shorter engineering lead-times, faster and more efficient
  - Growth support in Asia
  - Technical hub function
  - IP protection

\* This excludes R&D activities

### **Capacity growth in Asia - examples**

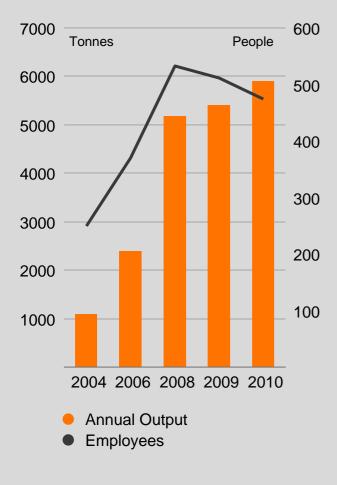

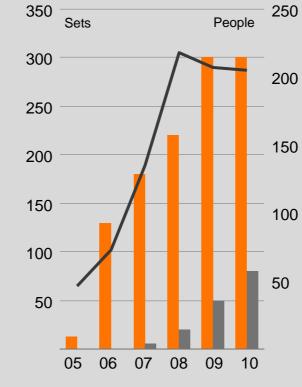

Wärtsilä CME (Zhenjiang) No 1 in China and 4th biggest FPP manufacturer in the world

Wärtsilä Qiyao Diesel Company Ltd. (Shanghai)

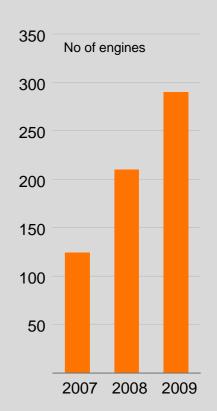

**Tunnel Thrusters** 

**Employees** 

Wärtsilä Transverse Thrusters

WÄRTSILÄ

Global economy and financial	Innovation & technical	Competitors and competitive landscape	Customer expectations	Regulations & environment
---------------------------------	------------------------	---	--------------------------	---------------------------

### Key issues:

- Volatile and unpredictable market calls for **flexibility in supply chain**
- Customer requests move from "technology" to "benefits of technology"
- Customer demands for quality (first time right and reliability), timely responses, short lead time, competitive life cycle costs, serviceability and high power output density.
- Environmental and Energy efficiency concern is raising throughout all world leaders.

### **Our transition: presence**

#### 2005

Engine division

- Vaasa (FI)
- Trieste (IT)
- Winterthur (CH)

#### Ship Power

- Khopoli (IN)
- Havant (UK)
- Drunen (NL)
- Santander (ES)
- Toyama (JP)
- Rubbestadneset PCP (NO)
- Slough (UK)

Expansion and focus to develop industrial competences in one division

#### 2009

Wärtsilä Industrial Operations

- Vaasa (FI)
- Trieste (IT)
- Winterthur (CH)
- Khopoli (IN)
- Havant (UK)
- Drunen (NL)
- Santander (ES)
- Toyama (JP)
- Rubbestadneset PCP (NO)
- Slough (UK)
- Wuxi (CN)
- Stord (NO)
- Bermeo (ES)
- Zwolle (NL)
- Rubbestadneset PCA (NO)
- JV's:
- Zhenjiang (CN)
- Qingdao (CN)
- Mokpo (KO)
- Lingang (CN)

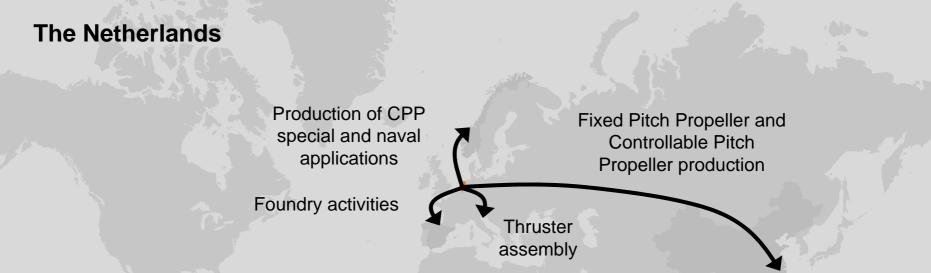

#### Targets 2010+

- Close to customers
- Assembly focused
- Global supplier base
- Plan to reduce European footprint
- Component manufacturing by supply chain

### **Plan to reduce European footprint**

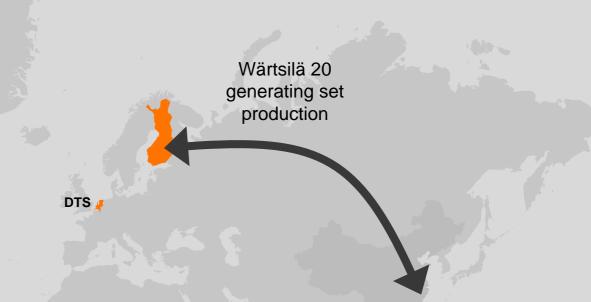

- Controllable Pitch Propeller manufacturing is planned to be moved to China and naval applications focused in Norway
- Thruster manufacturing is planned to be transferred to Trieste, Italy.
- **Foundry** (Fixed Pitch Propellers, blades and hubs) is planned to be moved to the existing foundries in China and Spain

### **Plan to reduce European footprint**

### The Netherlands

 Component manufacturing DTS in Zwolle is planned to be integrated into the supply chain.

### Finland

Wärtsilä 20 generating set production moved to China

#### **Back**

#### 2005

#### Engine division

• Engines (2-stroke and 4-stroke)

#### Ship Power

• Propulsion equipment

#### 2009

- Engines (2-stroke and 4-stroke)
- Propulsion equipment
- Automation equipment
- Ecotech products

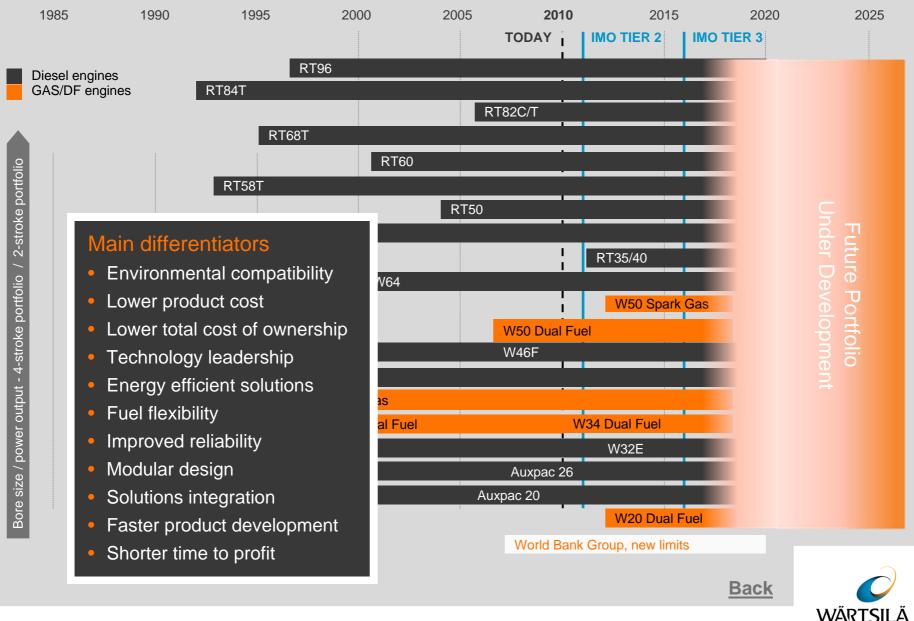

#### Targets 2010+

- Start renewal of portfolio
- Conceptual approach on commonality, modularity, platforms, design to manufacture, design to cost and design to service

# Wärtsilä engine portfolio & focus areas

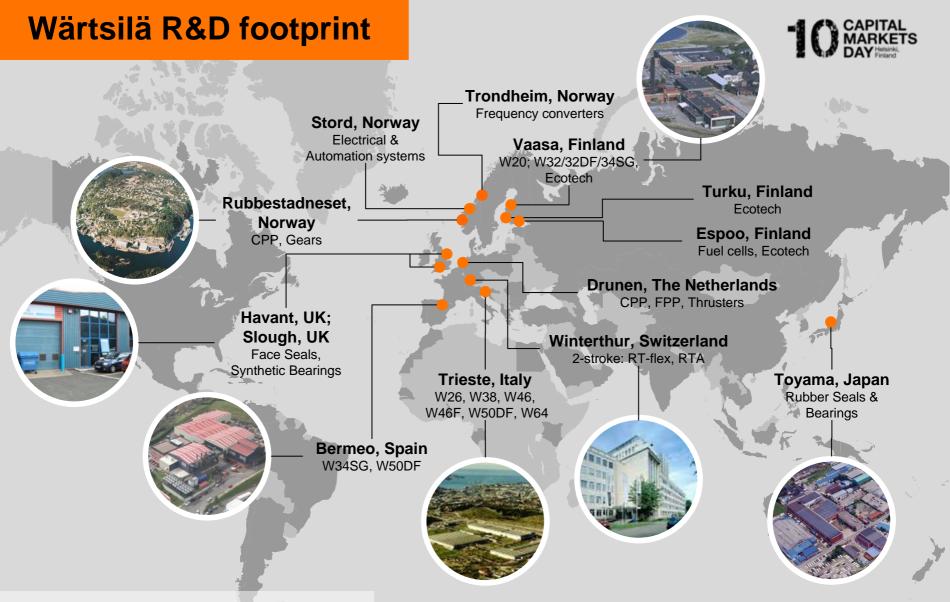

### Wärtsilä R&D environment

CAPITAL MARKETS DAY

Global challenges = our opportunities CLIMATE AND ENVIRONMENT		<b>ENERGY GUARANTEE</b> (reliable power supply)		
Customer focus = our foc ENERGY EFFICIENCY	CUS ULTRA LOW EMISSIONS	RELIABILITY	LIFE CYCLE COST	
Our strengths PEOPLE WITH KNOWHOW	INNOVATIONS	SYSTEMATIC WAY OF WORKING	TESTING & VALIDATION	
Our improvement areasSTATE-OF-THE-ART SIMULATIONSUPPLY CHAIN INTEGRATIONDESIGN FOR MANUFACTURING, ASSEMBLY, COST, SERVICE ABILITY				

WIO R&D ~740 employees R&D spending 2010: EUR 141 million

Continuous strong focus on R&D and life-cycle solutions will further strengthen Wärtsilä's position as technology leader

R&D will be maintained in Europe

# The WIO strategy 2010+

Main strategy	STRATEGIC GOAL We provide market leading products						
Main themes	Competitive product portfolio	R&D and manufacturing footprint with integrated supply chain	Quality, Delivery and Cost (QDC)				
■ Key Drivers	<ul> <li>Develop a streamlined portfolio of products</li> <li>Approach: commonality, modularity, platforms, design to manufacture, design to cost and design to service</li> </ul>	<ul> <li>Footprint close to the customers</li> <li>Capacity cost and capital efficiency</li> </ul>	<ul> <li>Focus on assembly and testing</li> <li>Flexible operations</li> <li>Pull production &amp; continuous flow</li> <li>Secure competitive product cost</li> <li>Supply chain integration</li> </ul>				
	<ul> <li>Environmental solutions</li> </ul>	<ul> <li>Product Life Cycle Management</li> </ul>	<ul> <li>Standard commodity as well as tailor made products</li> </ul>				
Key Enablers	<ul><li> People</li><li> Performance Culture</li></ul>	<ul><li>Process development</li><li>Continuous improvement</li></ul>	<ul><li> Project Management</li><li> Risk Management</li></ul>
