WELCOME TO WÄRTSILÄ CHINA

James Han, President of Wartsila China

Wärtsilä China today

- 20+ years history in China
- Strong manufacturing footprint through JVs, fully owned companies and 2-stroke engine licensing

- In marine market, some leading Chinese ship owners and shipyards are not only Wärtsilä customers, but also JV partners
- Wärtsilä Services provides service and maintenance for its customers in China through eight locations

Major Milestone of Wärtsilä in China

1978
As the first western company to license 2 stroke engine in China

1994 1st China sales office opened in Shanghai

2004

2005

1st wholly own

manufacturing

propulsion in Wuxi

venture for

1st manufacturing JV with CSSC for propeller in Zhenjiang, Jiangsu Province

2006

Formed 4 stroke engine JV with CSIC in Shanghai

2007

Inauguration of Tangzhen Service Station and Wartsila China headquarter in Shanghai 2008

Top management of Wartsila Ship Power moved to China

2011

2010

Wartsila China

was setup in

Shanghai

Engineering Center

Inauguration of CPP production at Wartsila Zhenjiang Propeller JV

2009
Established 2
stroke engine JV
with CSIC and

Mitsubishi

Key success factors for doing business in China

- Strong brand with leading technologies
- Product portfolio meeting growing market demands and regulatory changes
- Forging strategic local partnerships with strong market players
- Localization of manufacturing / supply chain / innovation capability
- Extensive market coverage through own sales and service network
- Strong local business creation capability
- High customer satisfaction rate
- Local talent and organizational development

Marine market trends and drivers in China

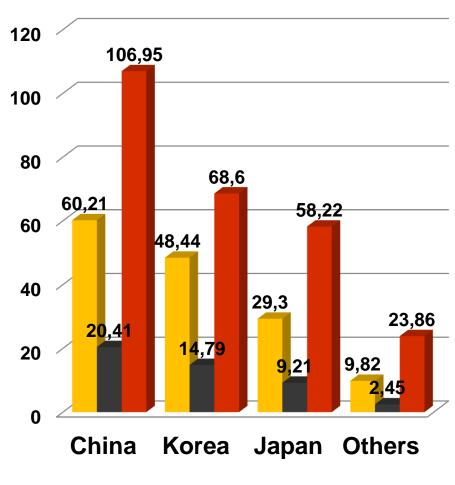

- Chinese shipbuilding is moving from low-cost merchant ships towards more complex high value vessels
- Shipbuilding overcapacity will drive consolidation with government plans to support top shipyards
- Growing intra-Asian trade and drive towards securing raw material imports and energy supply will enable growth of Chinese ship owners

Improved local footprint and leading system integration capabilities enables Wärtsilä to be the most valued partner to our customers

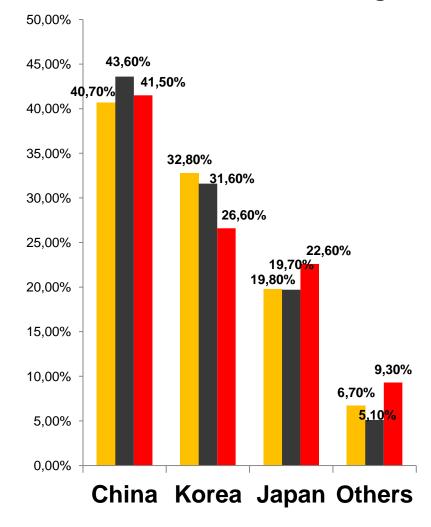

Shipbuilding Market Share in 2012

Million DWT

- New building completion
- New building order Intake
- Order book in hand

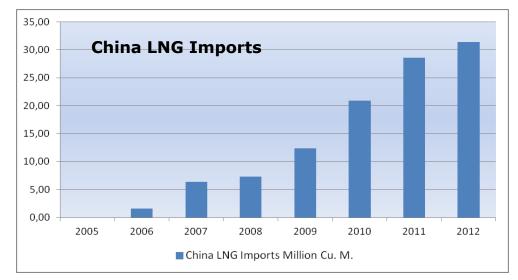

In Terms of Percentage

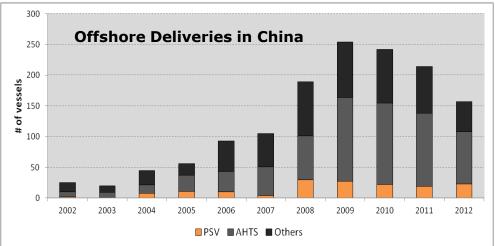

Data from CANSI

China is quickly moving towards more complex and high value ships both for energy security and shipbuilding competitiveness

- China has a strong strategic ambition to secure it's energy import
- There has been tremendous growth in LNG imports to China but LNG still represents only about 4% of the energy mix in China vs. a global average of 24%
- This will in turn increase opportunity for more and more LNG carriers owned and built in China

- Shipbuilding in the offshore segment is witnessing huge growth in China
- Many international ship-owners are still wary of Chinese shipyards capability to build such complex vessels
- Wärtsilä can form strategic partnerships with internal owners as well as local shipyards to provide complete solution to such vessels while the yards build the vessels "around" it

Main state-owned shipyards - CSSC, CSIC & COSCO

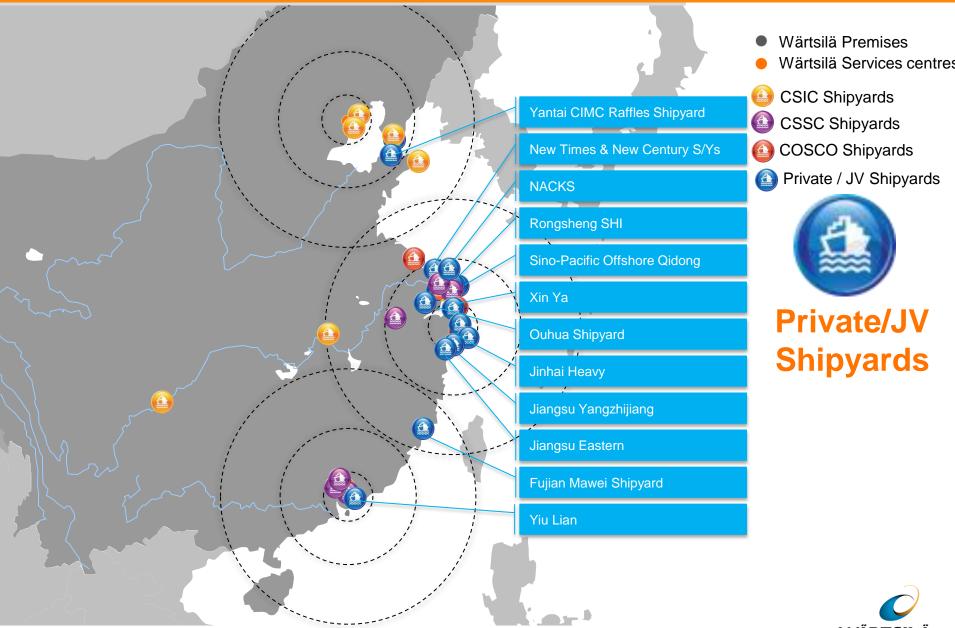

- Wärtsilä Premises
- Wärtsilä Services centres
- **CSIC Shipyards**
- **CSSC Shipyards**
- **COSCO Shipyards**

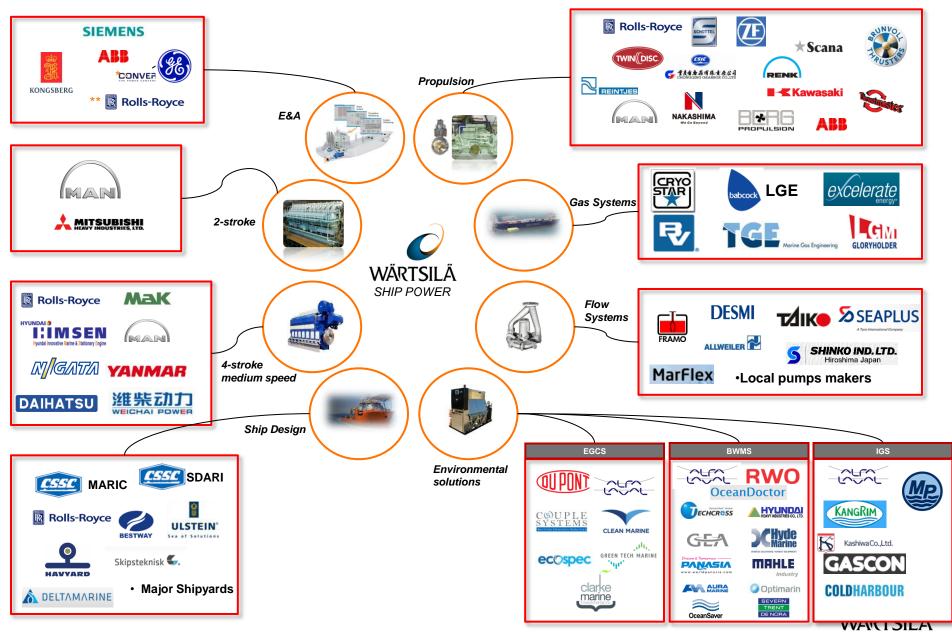

Some of the main private / JV shipyards in China

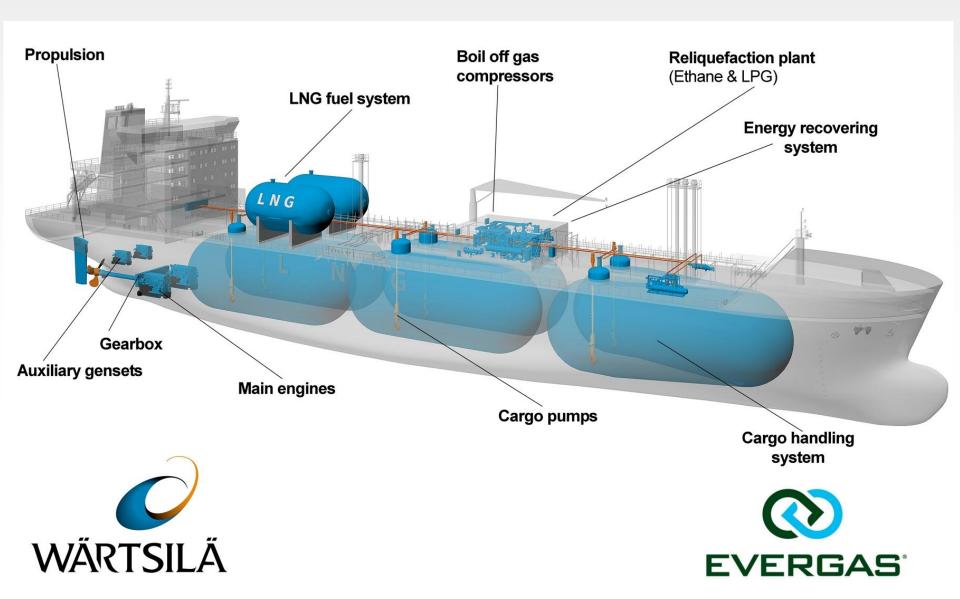

The competition is tough but outside engines it is more fragmented

The very competitive market demands multiple offerings in terms of products, solutions, pricing and services to differentiate

	Wärtsilä	MAN	Caterpillar	Rolls- Royce	Himsen (Hyundai)	Local Chinese brands	Japanese Import
Established Global Engine Brand	\checkmark	\checkmark	\checkmark	\checkmark	\checkmark		✓
Strong focus on Gas	\checkmark	\checkmark		✓	\checkmark		✓
Extensive Marine portfolio including Environmental Products	✓			✓			
System Integration including Ship Design and E&A	✓			✓			
Worldwide Service network	✓	✓	✓	✓			✓
Extensive manufacturing footprint in China	✓	✓	✓			✓	
Top-side/Cargo handling equipments (Oil/LPG/LNG)	✓						
Partnerships with local Chinese companies / customers(e.g. JV)	\checkmark		✓			✓	✓
Currency advantage of imported products (at present)							✓

Wärtsilä can offer integrated solution & support local Chinese yards in technically complex vessels to address ship-owner's concerns

Opportunities for power industry in China

Ambitious national target being set to slash the carbon emission level in 2020 to 40% ~45% of 2005 level

Policy maker is shifting to support low carbon economy with clean energy from Gas, Nuclear, Wind, and Solar

Power generating capacity to grow to ~ 1,500 GW by 2020 with gas to reach ~ 100 GW, or 6% of total capacity

Wind power has been developed at brisk pace with total installed capacity of 45 GW in 2010, and expected to exceed 5% of grid load in 5 years

Wärtsilä Power Plants history in China

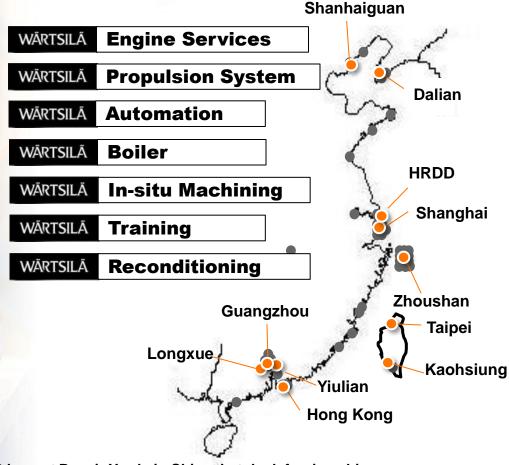

- **1990's to early 2000** when availability of electricity from grid could not meet increasing demand, Wärtsilä focuses on captive power plants for industrial parks.
- **2000 2005** China ramped up the construction of large coal fired power plants. Wärtsilä targets the market for black start units for large power stations.
- **2006 2009** China mining and construction companies started to expand overseas. Wärtsilä supplies power plants to Chinese EPC contractors for overseas projects in remote areas.
- **2010 Present** China is putting focus on renewable energy, smart grid concept and power system energy efficiency, providing opportunities for Wärtsilä's solutions

Wärtsilä Services in China

We provide total and 24/7 services

Wärtsilä presence

Major Wärtsilä Services workshops in China

Shanghai

Established: 1999

Location: Tangzhen Shanghai

Main activities:

- Reconditioning
- External Field Services
- In-situ and Afloat repair
- Automation
- Commissioning and Start-ups

Guangzhou

Established: 1994

· Location: Nansha, Guangzhou

- Field service covering southern China
- Specialized in servicing Woodward governors and ABB/Napier Turbo Chargers
- Workshop reconditioning of entire gensets

Hong Kong

Established: 1991

- Located in Hong Kong United Dockyards (HUD)
- Supporting visiting vessels, Hong Kong ship owners and ship management companies

Service cooperation with Chinese shipyards

In order to serve customers better, Wärtsilä China entered a cooperation with major shipyards in China.

A team of Wärtsilä experts is permanently stationed there and jointly provide a full range of field services.

Delivery Centre – Thrusters, Seals, Bearings / Wuxi

Delivery Centre - 2-stroke engines / Qingdao

Qingdao Qiyao Wärtsilä MHI Linshan Marine Diesel Co., Ltd

Inauguration April 2009

Employees: 490 (April 2013)

Joint Venture (Wärtsilä 34%, CSIC¹ 50%, MHI² 16%)

Note: 1 CSIC = China Shipbuilding Industry Corporation, 2 Mitsubishi Heavy Industries

Delivery Centre- Environment & Safety Product / Suzhou

- Inauguration in 1998 (former Hamworthy Suzhou)
- Employee: 103 (April 2013)
- Products: sewage water treatment plants, inert gas systems, control panels

Sourcing in China

- Supports both local needs in China (cost and short lead times) and export to Europe (cost)
- Increasing part of our purchase volume will be sourced in China.
- Significant part of our strategic sourcing organisation located in China –one critical factor for success
- Other critical factors for success: local engineering, focus on quality, multi functional task, local production

Supporting Wärtsilä's growth strategy in China

New JV for Wärtsilä medium speed engines in China

Wärtsilä -Yuchai Engine Ltd. Co.

Location: Zhuhai, China

Products: W20, W26, W32

Operations planned to start in 2014

Growth drivers in China

- World second largest economy and biggest trading nation
- Sustained GDP growth expected to continue
- 2015 and beyond: starting to rival US in economic scale
- One fifth of world population with rapidly rising middle class population and urbanization
- Domestic consumption provides a huge market for the world
- Target to remain one of the largest shipbuilding countries
- Shifting policy to clean energy and low carbon economy

Wärtsilä China Future Strategy

- Launch key initiatives (e.g. 4-stroke engine JV) to support long term growth
- Strengthen high level customer contacts and external relationships (government, JV partners, etc) to ensure business success.
- Simplify operating model with entrepreneurial driven organization to be more agile and react faster
- Create a strong China organization by introducing best practices, professionalism and high performance culture
- Attract develop and retain the best talents to create highly motivated workforce
