Wärtsilä

Shaping the decarbonisation of Marine and Energy

Roadshow presentation November 2021
Wärtsilä in brief

Wärtsilä is a global leader in innovative technologies and lifecycle solutions for the marine and energy markets. We emphasise innovation in sustainable technology and services to help our customers continuously improve environmental and economic performance. Our dedicated and passionate team of 17,500 professionals in 200 locations in more than 70 countries shape the decarbonisation transformation of our industries across the globe. In 2020, Wärtsilä’s net sales totalled EUR 4.6 billion. Wärtsilä is listed on Nasdaq Helsinki.

LTM Q3/21 = Last 12 months, Q4 2020 – Q3 2021
As a technology leader in the decarbonisation transformation, Wärtsilä has significant value creation potential

### Decarbonisation will transform the world

- **Electricity generation** will grow by 3X, renewables by 8X
- By 2030 **balancing power** market will grow by >10x
- In Marine there will be an **unprecedented rate of change** in new build and existing fleet
- Regulations and **demand for green transport** will accelerate the speed of change

### Pioneer and leading partner for decarbonisation

<table>
<thead>
<tr>
<th>Leading</th>
<th>Leading position in</th>
<th>Pioneer and partner for</th>
</tr>
</thead>
<tbody>
<tr>
<td>Future fuels technologies - Flexibility - Efficiency</td>
<td>- Thermal balancing - Energy storage</td>
<td>- Hybrids &amp; Full electric - Fuel cells - Energy saving devices</td>
</tr>
</tbody>
</table>

### Set for performance

- **Well-positioned** to leverage market recovery and growth
- **Robust execution**
  - Well-aligned strategy – The Wärtsilä Way
  - Focus on performance culture
  - Clear capital allocation & portfolio management
- **Committed to targets**
  - 5% annual organic growth
  - 12% operating margin
- **Ambitious sustainability targets** for 2030
  - A **product portfolio** ready for zero carbon fuels
  - Carbon neutral in **own operations**
Our world
Marine will move with an unprecedented speed towards decarbonisation

Shipping generates approx. 2% of GHG emissions \(^1\)

### Regulations & Markets

- **IMO target**: 50% lower GHG in shipping by 2050
- **Cost of compliance**: IMO design requirements, EEXI & CII
- **Access to capital**: EU taxonomy, Poseidon principles and ESG
- **Cost of carbon**: carbon certificates e.g. EU Fit for 55, IMO carbon levy and local green policies
- Green sea transport demand driven by companies’ green customer commitments and investors’ push for sustainability targets

### Technology

- Focus on **carbon neutral and zero carbon fuels**. Carbon fuels still used for many years
- Increase in **hybrid and battery systems**
- Development of **energy saving devices**
- Next steps in abatement technologies e.g. carbon capture and storage
- Focus on **fuel efficiency**
- Focus on **fuel flexibility and upgrades**

### Connectivity and Data

- **Vessels as data pools** - system complexity increasing
- **Optimisation solutions** taking an holistic view of the entire transport system
- **Performance-based agreements** with focus on uptime, reliability and fuel efficiency
- **Cyber security** growing in importance
- Different degrees of **autonomous operations**

---

1) Source: Climate Watch, total 49.4 GtCO2e
Energy is moving towards a 100% renewable future

Electricity and heat generate approx. 30% of GHG emissions 1)

Growing electricity demand
- Electricity generation is expected to grow by 3X, renewables by 8X 2)
- Gradual replacement of coal and other fossil fuelled energy generation
- Power systems becoming increasingly complex with different generation assets

Policies & Regulations
- EU: Carbon neutral by 2050
- USA: carbon free electricity production by 2035, net zero emissions by 2050
- China: Carbon neutral by 2060
- Country climate pledges likely to become more progressive

Technology disruption
- Wind and solar growing rapidly for baseload generation
- Intermittent sources requiring balancing power
- Green fuels for thermal balancing
- Digitalisation will create opportunities for optimising energy costs
- Cyber security growing in importance

1) Source: Climate Watch, total 49.4 GtCO2e 2) IEA World Energy Outlook 2021 (Net Zero Emissions Scenario), until 2050 with electrification of transport, buildings and industrial sectors
Transform – Decarbonisation creates new business opportunities
Decarbonisation of Marine and Energy is accelerating. Large regional variances in speed of change

Share of carbon neutral and zero carbon fuels in maritime

<table>

Owners will decide on technology partners now:
- Vessel life is 25-30 years
- Critical decision criteria:
  i) Multifuel capabilities for blending with green fuels
  ii) Conversion capabilities for future fuels

Share of renewables in global electricity generation

<table>

Source: DNV Maritime Forecast 2050 model, Wärtsilä Internal estimates 1) Total electricity generation (TWh) from 2020 to 2050, IEA World Energy Outlook 2021 (Net Zero Emissions Scenario)
There is no silver bullet – entering an era with numerous technologies and fuels

Future technologies …

- **Fuels:**
  - Biofuels
  - Methanol
  - Ammonia
  - Hydrogen

- **Fossil fuels will be around for a long time.**
  Gradual conversion from fossil to green fuels

- **Transition accelerated by blending green and carbon fuels**

- **Growth in performance-based agreements**
  leveraging digital solutions

… In Marine

- **Battery technologies:**
  - Hybrids / plug-in hybrids
  - Full electric

- **Energy saving technologies:**
  - Air lubrication
  - Flettner rotors
  - Solar PV
  - Hydrodynamic devices

- **Optimisation solutions:**
  - Route optimisation
  - Predictive maintenance
  - Vessel analytics

- **Autonomous solutions:**
  - Situational awareness and safety

… In Energy

- **Rapid growth in intermittent renewables drives growth in balancing power**

- **Energy storage will grow significantly**

- **Thermal balancing growing – reciprocating ICEs have leading flexibility and energy efficiency**

- **Thermal balancing and energy storage are complementary**

- **Power system optimisation operating different generation assets**

1) When generated with green electricity
Wärtsilä is very well-positioned for the decarbonisation transformation

Leader in

- **Carbon neutral & zero carbon fuels**
  - Available today: biofuels, methanol, up to 25% hydrogen blends
  - 2023: ammonia concept
  - 2025: 100% hydrogen concept

- **Energy efficient fossil fuels**

- **Power system optimisation**
  - Energy storage
  - Thermal balancing power

Pioneer in

- **Marine electric drivetrain**

- **Marine carbon capture**

- **Marine optimisation and autonomous solutions**

- **Partnering for complementary technologies**
  - Fuel cells
  - Air lubrication
  - Flettner rotors
Leading the decarbonisation journey with a strong commitment to R&D and through partnering for a broad solution offering

Proactive dialogue on customers’ specific technology roadmap

Competence & experience to engage in a credible customer dialogue on "all" technologies

Solution offering for "most" technologies

Leveraging leadership in core technologies and partnering for complementary technologies

Key takeaways

- Working with many of the new technologies for decades
- Conversion to new fuels requires only a limited number of new engine parts
- Large technology synergies between Marine and Energy
- Transformation manageable with a stable R&D allocation of ~3% of net sales
Perform – Leverage market recovery and growth
Wärtsilä well-positioned as #1-3 in global markets – focus on organic growth driven by decarbonisation and services. Complement with potential partnerships and bolt-on acquisitions.

<tr>
<th>Categorisation per customer type</th>
<th>Enablers for growth</th>
</tr>
</thead>
</table>
| Spend ratio EUR/kW              | ▪ Leveraging digital solutions  
|                                 |   - Customer intelligence  
|                                 |   - Automated lead management  
| % of installed base             | ▪ Redefining our offering  
| %<70%                          | ▪ Effective global logistics  
| Customers with larger transaction amounts |  
| Customers with smaller transaction amounts | |

- **1X** refers to average EUR/kW for all transactional business customers
- **% of installed base in GW excluding QuantiParts**

---

1) 1X refers to average EUR/kW for all transactional business customers
2) % of installed base in GW excluding QuantiParts
Performance-based agreements have significant growth potential, both in Marine and Energy

Enablers for growth

- Optimised asset performance for our customers
- Leveraging connectivity, big data, machine learning and extensive service network
- Successful experience from several projects in Marine and Energy

Moving up the service value ladder

Spend ratio EUR/kW

Baseline 1X

2-5X

Agreements & Performance-based agreements

25% of installed base
Green transition is expected to provide a notable opportunity for retrofits and conversions

- 4S/2S Marine HFO to LNG/green fuels
- 4S Energy HFO to gas

Installed base

<table>
<thead>
<tr>
<th>4S/2S Marine HFO to LNG/green fuels</th>
<th>Future potential for conversions to green fuels</th>
</tr>
</thead>
</table>

Estimated total market size of EUR ~2.5bn

1) depends on fuel availability 2) estimated total market size over 5-10 years
Demand for electricity will grow by 3X with renewables being the way forward, thus accelerating the demand for balancing power

**Baseload**

Addressable annual market (GW)

- 2020: 12
- 2030: -

- Baseload market moving towards thermal balancing as share of renewables increases

**Thermal balancing**

Addressable annual market (GW)

- 2020: 2
- 2030: 30

+30% p.a.

- Reciprocating engines are the most suitable technology for thermal balancing with leading capabilities in quick ramping, flexibility, and energy efficiency

**Energy storage**

Addressable annual market (GWh)

- 2020: 5
- 2030: 55

+30% p.a.

- Significant growth expected in front-of-meter energy storage
- Complementary to thermal balancing due to long- and short-term balancing needs

Source: Bloomberg New Energy Outlook 2020, Wärtsilä estimates 1) Key markets 10-15 GW
Wärtsilä’s energy storage business is growing rapidly and is expected to become profitable within a few years

Power system optimisation for the lowest energy cost, highest uptime and reliability

Our value proposition

**Power system optimisation offering**

- Complete balancing power offering
- Strong capabilities in optimising different generation assets
- Leading software platform, GEMS, to scale and optimise performance

**Strong execution skills**

- Sector proven partner with strong energy track record
- Competitive supply chain

Energy storage key facts

Global #1-3

2021 order intake
> EUR 700m

>6X growth from 2020 1)

~70% long term service agreements

Proven power system optimisation

1) Order intake
Perform – Robust execution
The Wärtsilä Way sets the scene for profitable growth

Purpose
Enabling sustainable societies through innovation in technology and services

Target position
Shaping the decarbonisation of Marine and Energy
- New financial targets
- New decarbonisation targets

Strategic priorities
Roadmap to improve performance and reach Target Position

Values
Customer Success, Passion, Performance
Strategic priorities to improve performance and reach Target Position

1. Excel in creating customer value
   We continuously evolve our understanding of and responsiveness to our customers to make them successful.

2. Develop high performing teams that make a difference
   We attract high performing people and excite diverse teams that excel in continuous learning and collaboration. Our leaders provide direction and support, empowering people to act.

3. Drive decarbonisation in Marine and Energy
   We accelerate decarbonisation in Marine and Energy through innovation, focused investments and selective partnerships, while also decarbonising our own operations. We provide optimisation solutions and are a thought leader in our industries.

4. Capture growth in services
   We excel in transactional and retrofit business. We move up the service value ladder by growing in performance-based agreements.

5. Continuously improve our end-to-end value chain
   We continuously improve our end-to-end business to meet customer expectations on quality, lead time and delivery accuracy, while reducing complexity and improving competitiveness. We leverage digitalisation throughout our value chain.

- Improve performance in existing businesses
- Generate profit and cash to fund
  - Business and technology transformation
  - Good shareholder returns
- Clear capital allocation principles and active portfolio management
Ambitious sustainability targets for 2030

To provide a product portfolio which will be ready for zero carbon fuels

To become carbon neutral in our own operations
Why invest in Wärtsilä
Set to deliver long term shareholder value

We have clear financial targets and are committed to realising them

Our balance sheet and financing structure supports strategy execution

We have clear capital allocation principles
New financial targets reflect growth opportunities and increased profitability

<table>
<thead>
<tr>
<th>New targets</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Net sales</strong></td>
</tr>
<tr>
<td>5% annual organic growth</td>
</tr>
<tr>
<td><strong>Profitability</strong></td>

</tbody>
</table>
Good growth opportunities in services, energy, and marine new build recovery. Our installed base provides a strong foundation for services growth

Key drivers

Storage
- Fast growing demand for energy storage and power system optimisation solutions

Services
- Increased share of wallet from existing customers
- Deeper penetration of installed base
- Decarbonisation retrofits
- New business models

Thermal balancing
- Increased demand due to coal shut-downs
- Thermal balancing power complementing energy storage

Marine new build market recovery
- Cruise & Ferry and Special Vessel segments in particular

Limited additional CAPEX needed to facilitate the growth

Target: 5% annual organic growth
We will reach our profitability target while maintaining R&D investments at ~3% of net sales

Starting point: Operating margin 5.9% (LTM Q3/2021)

Key drivers

- Marine and Energy Services growth
- Thermal balancing power growth
- Storage growth
- Voyage turnaround and digital growth
- Pricing
- Continuous improvement >0%
- Cost inflation

Target:
12% operating margin

Limited additional CAPEX needed to facilitate the growth
Committed to providing shareholder returns

Target: dividend of at least 50% of earnings

1) Dividend per earnings
Strong cashflow driven by solid working capital efficiency programme. Working capital improved beyond volume fluctuations

**Key drivers**

- **New approach to receivables collection**
  - Broader organisational involvement
  - Increased use of robotic process automation tools
- **Global inventory management**
  - Reduction of local stocks
  - Global inventory transparency
  - JIT stock for lifecycle agreements
- **Maintaining good payment terms with suppliers** despite lower volumes
- **Expanding supply chain finance solutions** to more suppliers

THIRD QUARTER HIGHLIGHTS

Net sales EUR 1,103 million
- 20% increase in service sales

Comparable operating result EUR 87 million
- 43% growth
- More favourable sales mix between equipment and services
ORDER INTAKE INCREASED BY 21%

- Order intake increased across all businesses
- Equipment order intake increased by 29%, supported by strong growth in energy storage orders
- Service order intake increased by 14%
SLIGHT INCREASE IN ORDER BOOK DESPITE DIVESTMENTS

BOOK-TO-BILL CONTINUED TO IMPROVE

Order book by business

Order book delivery schedule

* As published in the Interim report January-March 2020, order book figures for 2019 have been restated due to stricter requirements for booking new orders.
Appendix
Wärtsilä Marine Power leads the industry in its journey towards a decarbonised and sustainable future. Our broad portfolio of engines, propulsion systems, hybrid technology, and integrated powertrain systems deliver the efficiency, reliability, safety, and environmental performance needed to support our customers. Our offering includes performance-based agreements, lifecycle solutions, and an unrivalled global network of maritime expertise.

LTM Q3/21 = Last 12 months, Q4 2020 – Q3 2021
We at Wärtsilä Marine Systems support our customers with high quality products and lifecycle services related to the gas value chain, exhaust treatment, shaft line, underwater repair and electrical integrations. We are committed to providing the latest and most efficient solutions, in line with Wärtsilä's vision for a safe and sustainable future for our customers, our communities, and our planet.

Comparable operating result

LTM Q3/21 = Last 12 months, Q4 2020 – Q3 2021
Wärtsilä Voyage transforms how vessels perform their journeys and how ports manage their operations by leveraging the latest digital technologies. Using data and AI-driven software, we deliver real-time insights into operations, performance, and energy use to enhance safety, efficiency, and reliability, while minimising emissions. Our solutions combine bridge infrastructure, cloud data services, decision support systems, and smart port solutions to enable shore-to-shore visibility. We are committed to building an end-to-end connected digital ecosystem for shipping where all vessels, ports, and logistics infrastructure beyond are technologically smart, and all operations are safe and sustainable.
Wärtsilä Energy

Wärtsilä Energy leads the transition towards a 100% renewable energy future. We help our customers in decarbonisation by developing market-leading technologies. These cover future-fuel enabled balancing power plants, hybrid solutions, energy storage and optimisation technology, including the GEMS energy management platform. Wärtsilä Energy’s lifecycle services are designed to increase efficiency, promote reliability, and guarantee operational performance. Our track record comprises 74 GW of power plant capacity and more than 80 energy storage systems delivered to 180 countries around the world.
