	S-64 Edition 2.0.0 <b>valid ONLY until 31.08.2017</b>	S-64 Edition 3.0.(3)	S-64 Edition 3.0.(3)	S-64 Edition 3.0.(3), December 2020 <i>See Note 2</i>

Note 1: Edition 3.1 should be used in conjunction with: Supplement 3 (June 2014); and Maintenance Document 8 (Clarifications which are also classified as corrections should not be applied).

Note 2: The up-to-datedness of the ECDIS in regard to the installation of the latest Edition of the Standards is represented by the first 2 digits of the Edition number. The 3rd digit of the Edition number (in brackets) indicates a clarification version of the Standard; clarifications have no impact on safety of navigation or ECDIS performance.

These Editions are the normative references for the type approval of ECDIS systems referring to the 4th edition of IEC61174 (2015). Despite the care taken in preparing these New Editions, their effective implementation may reveal imperfections. Please use the [change proposal form](#) to report any change that may be required.

Note 3: Only if ECDIS software supports RCDS mode.

Note 4: The changes to edition 1.1.0 (2008) introduced in the subsequent versions are as follows:

Edition 1.1.1 (April 2012): The changes affect the manufacturer identifier (M\_ID). They are transparent for the end user.

Edition 1.2.0 (January 2015): An additional Annex C is added to Edition 1.1.1 to provide a normative reference for the ENC update status report. Compliance with this new Annex applies only to those ECDIS systems that are type-approved in accordance with the 4th Edition of IEC61174 (2015). There is no retrospective impact on ECDIS systems which have been type-approved earlier.

Edition 1.2.1 (March 2020): Includes a minor clarification to Edition 1.2.0 providing guidance to more formally structure the README.TXT file at section 6.6. There is no impact from this clarification on ECDIS systems or ECDIS type-approval.
