

Wärtsilä Auxiliary equipment parts

For all Wärtsilä customers, cost-efficient operations and optimised availability are just as critical to auxiliary, control and monitoring systems as they are to engines. Wärtsilä Auxiliary equipment parts enable a proactive approach to maintenance that minimises the risk and costs associated with unplanned downtime for a wide range of equipment in operationally critical auxiliary systems.

HIGH-QUALITY PARTS AT COMPETITIVE PRICES

Wärtsilä provides spare parts and related services for all Wärtsilä-delivered auxiliary equipment in power plant and marine installations. As a leading OEM with global vendor supply agreements and large-scale operations we can ensure high-quality parts at competitive prices through a streamlined sourcing and supply chain. Customers benefit from a single point of contact for all mechanical and electrical system spare parts and consumables for engines, gensets and auxiliary equipment.

KEY BENEFITS

- Simplified parts management with one supplier for all spare parts and consumables
- High-quality OEM parts for increased safety and reliability
- Competitive pricing
- Easy online purchasing 24/7 via Wärtsilä Online

Maintenance services, consumables and spare parts are available separately or as part of a package for equipment in the following systems:

Power plants

- Fuel system
- Lubricating oil system
- Charge air system
- Cooling water system
- Starting air system
- Control air system
- Ventilation system
- Steam production system (boilers)
- Fresh water production system (evaporators)
- Heat recovery system (turbines)

Marine installations

- Fuel system
- Lubricating oil system
- Combustion air and exhaust gas system
- Cooling water system
- Compressed air system

SCOPE OF SUPPLY

Our offering includes everything from complete auxiliary units such as fuel booster and separators to individual components like gaskets and sealing sets. We have equipment-specific upgrade packages and alternative or updated components, and can also provide installation-specific spare parts packages that include wear and tear parts, maintenance-related consumables or recommended parts to keep on site.

24/7 ONLINE ORDERING VIA WÄRTSILÄ ONLINE

You can browse and order parts 24/7 via Wartsila Online, which includes illustrated catalogues with price and availability information. You can also review your order history and track and trace parts deliveries. Parts can also be ordered through your local Wartsila representative.
