

WÄRTSILÄ ICS SECURITY FOUNDATION

ESTABLISHING SOLID CYBER SECURITY MANAGEMENT SYSTEM (CSMS)

Wärtsilä and customer **ANALYSE** current situation and **IDENTIFY** critical assets and risks.

Wärtsilä **DEVELOPS** procedures and documentation (strategic, tactical, operational) as a foundation for a CSMS.

REPORTING

Wärtsilä regularly (annual clock) **MONITORS AND REPORTS** the status of CSMS.

RISK MANAGEMENT REVIEW

Wärtsilä **ANALYSES** customer's cyber security risk management status. This covers customer's current processes, procedures and documentation.

Customer **IMPLEMENTS** actions with Wärtsilä's support and **ALLOCATES** dedicated resources.

Customer's organisation **APPROVES** the CSMS.

Established **CSMS** covers all cyber security management concerns and topics that are relevant to the customer risk management and compliance.

YOUR BENEFITS

- ✓ Build-up cyber security resilience
- ✓ Manage cyber security risks
- ✓ Define and set up a foundation for ICS cyber security
- ✓ Be prepared for frequent, and often compulsory, audits
- ✓ Provide clear evidence to the management board about how cyber risks are being managed
