

WÄRTSILÄ OVERHAUL SERVICES

The problem

-  **Reliability** and **efficiency** are difficult to maintain without overhauls performed by the OEM
-  **SFOC can increase by 0.5–1.25%** between engine overhauls
-  A **major breakdown** can be caused by the **failure of a single small part**

The solution

- Spare parts**
Standard, inspection-dependable OEM spare parts
- Workshop**
Maintenance services in workshops
- Advisory**
Expert advisory services
- Field services**
Highly skilled teams perform overhauls
- Audits**
Pre-audits and follow-up inspections
- Upgrades**
Upgrades installed during an overhaul

The result

-  **Maximised uptime and safety** with lower costs
-  **Increased cost effectiveness** through preventive maintenance
-  **Up to 50% longer lifetime** with OEM spare parts

The Wärtsilä difference

-  **Technical support** and analysis based on your unique needs
-  **Data management** to ensure the right parts are specified
-  **R&D** for continuous component improvements
-  **Quality and safety** with a warranty of up to 30 months
-  **One contact point** for all spare parts and consumables
-  **24/7 online services** for expert advice and parts ordering

- 3,600** field professionals
- 12,000** customers
- 58,500** quality inspections
- 16,400** classification certificates provided
- 100,000** field service jobs
- 70** workshops
- 111,200** deliveries shipped
